

Data Interpretation Part-1

I.Directions(Q.1-5) Study the table carefully to answer the questions that follow :

Marks Obtained by five Students in six Subjects

Subjects	Hindi	English	Sc.	S.St.	Physics	Biology
Max Mks & Students	60	80	100	120	150	100
Puru	30	70	82	110	132	87
Shweta	42	78	60	88	75	74
Jyoti	50	67	89	80	139	81
Ritika	36	40	79	92	66	60
Annu	42	72	96	88	133	80

1. Which of the following two students have obtained same total marks in all the six subjects together?

- 1)Puru&Shweta 2)Jyoti&Ritika 3)Ritika and Annu
4)Annu&Puru 5) None of these

2. In how many subjects, Jyoti has obtained highest marks ?

- 1) 1 2) 2 3) 3 4) 4 5) None of these

3) In which subject / subjects, Puru has scored the highest marks?

- 1) English 2) S.St. 3) Biology 4) Data Inadequate
5) None of these

4. The marks obtained by Shweta in Sc. is what percent of the marks obtained by Jyoti in S. St.?

- 1) 84% 2) 75% 3) 62% 4) 59% (5) None of these

5. What is the approximate average marks obtained by all the students together in Hindi?

- 1)40 2)42 3) 45 4) 55 (5) None of these

II.Directions(Q.1-5) Study the table carefully to answer the questions that follow :

Percentage of Marks Obtained by five Students in six Subjects

Subjects	Hindi	English	Maths	Sanskrit	Economics
Total marks	125	100	75	150	125
Shalin	40	85	50	48	60
Alka	70	84	60	48	80
Rahul	44	95	57	52	70
Kushal	90	80	44	42	40
Prahlad	60	88	82	66	30
Dev	50	92	63	54	90

1. What is the ratio of the marks obtained by Alka in Maths and marks obtained by Kushal in Economics ?

- 1) 11:12 2) 9:11 3) 10:9 4) 9 : 10
(5) None of these

2. Dev got highest percentage of marks in which subject?

- 1) Hindi 2) English 3) Maths 4) Data Inadequate
5) None of these

3. What is the approximate overall % obtained by Prahlad in the examination?

- 1)79% 2)63% 3) 59% 4)52% (5) None of these

4. In how many subjects does Alka score more than Shalin?

- 1) 1 2)2 3)3 4)4 5) None of these

5. In all the subjects together, what is difference between the average marks obtained by Shalin and Alka?

- 1) No difference 2)13.50 3)21 4)32 5) none of these

Data Interpretation Part-1

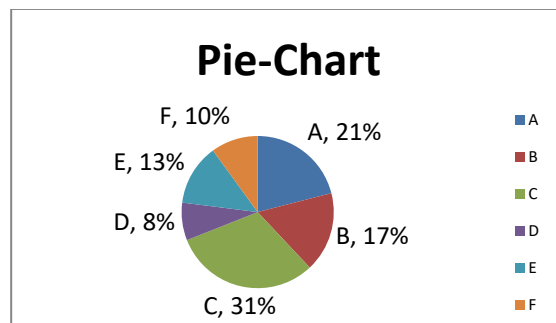

III. Directions (Questions 1 - 5): Answer the questions based on the following information. The given data in the table show the prices (for both buying and selling) of five different stocks over a period of one week.

Stocks	Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7
V	23	45	20	99	81	20	48
W	412	465	498	499	502	567	588
X	52	43	58	64	62	72	89
Y	417	418	425	414	322	358	356
Z	78	82	75	69	63	64	68

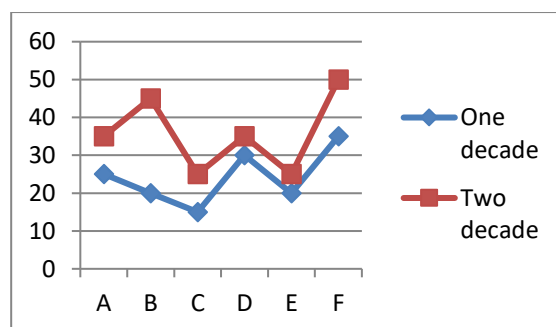

- Which of the following stocks has shown a continuous increasing trend over the given period?
1) V 2) W 3) X 4) Y 5) None of these
- Which of the following stocks has registered the maximum percentage increase over the given period?
1) V 2) W 3) X 4) Y 5) None of these
- If Manish Purchased 1000 shares of stock Z on Day 3 and sold 500 shares each on Day 6 and Day 7, how much amount he lost in the transaction ?
1) Rs.11,000 2) Rs.10,000 3) Rs.9,000
4) Data Inadequate 5) None of these
- Manav and Mihir purchased 100 shares each of Stock W on Day 2. Manav sold all his shares on Day 6 and Mihir on Day 7. Find the difference between the profit earned by them.
1) Rs.21,000 2) Rs.19,000 3) Rs.25,000
4) Data Inadequate 5) None of these
- Mr. Sharma purchased 48,945 shares of Stock X on day 1 and sold all the shares on Day 5. Find the approximate percentage profit earned by him?
1) 19% 2) 25% 3) 32% 4) 49% (5) None of these

IV. Directions (Q.1 - 5):Following pie-chart shows the percentage distribution of total population of six different cities in the year 1970. The total population all the six cities together is 3 crore.

The line graph shows the percentage growth of population of these six cities in two decades, 1970-1980 and 1980-1990.

The line graph shows the percentage growth of population of these six cities in two decades, 1970-1980 and 1980-1990.

- What will be the population of City D in the year 1990?
1)42.2 lakh 2)41.21 lakh 3)42.12 lakh
4)42.10 lakh 5)42 lakh
- The population of City B in the year 1990 is what percentage of its population in the year 1970?
1)145% 2)174% 3)147% 4)174.5% 5)154%
- What is the ratio of the population of City A in the year 1980 to the population of City B in the year 1980?
1)136:175 2)126:170 3)25:32 4)175:136
5)3:4
- What is the percentage rise in the population of City A from 1970 to 1990?
1)67.75% 2)68.75%
3)62.5%
4)168.75% 5)None of these

Data Interpretation Part-1

5. What is the population of the city C in 1970?

- 1) 63 lakh 2) 61 lakh 3) 60 lakh
4) 66 lakh 5) None of these

V. Directions (Q.1-5): Study the table carefully to answer the questions that follow:

Expenditure (Rs. Lakh) & % profit earned by two companies in six years.

Year s	Company A		Company B		Company C	
	Expen diture	% Profit	Expe ndit ure	% Profi t	Expen diture	% Pro fit
2008	410	12	510	10.5	500	12.5
2009	580	14	300	17.5	480	25
2010	650	10.2	420	20	820	7.5
2011	320	10	300	14.5	325	12
2012	200	19.5	680	12.5	610	35
2013	150	30	540	25	850	22.5

1. Total profit (Rs. Lakh) earned by Company A in the year 2008 was approximately what % of the total profit earned by Company C in the same year ?

- 1) 67% 2) 79% 3) 84% 4) 91% 5) None of these

2. What was the difference (in Rs. Lakh) between the expenditure of Company B in the year 2013 and the average expenditure of Company B over the years ?

- 1) 82 2) 87 3) 95 4) 98 5) None of these

3. What is difference between the income (in Rs. Lakh) of Company A in the year 2009 and the income of Company C in the same year?

- 1) 96.7 2) 84.5 3) 72.1 4) 61.2 5) None of these

4. Expenditure of Company B in the year 2011 is approximately how much percent less than expenditure of Company A in the same year?

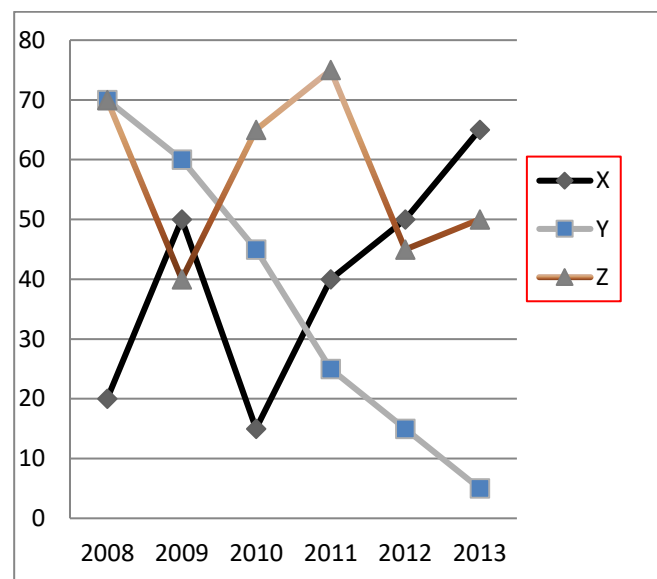

- 1) 3% 2) 6% 3) 9% 4) 13% 5) None of these

5. What was the ratio of the approximately profit earned by Company A, Company B and Company C in the year 2008?

- 1) 49:35:28 2) 35:17:48 3) 49:54:63
4) 63:45:27 5) None of these

VI. Directions (Q.1-5): Study the table carefully to answer the questions that follow:

Percent profit earned by three companies over the given years

1. If the profit earned by Company Z in financial year 2012 was Rs.666 lakh, what was the ratio of total income to total expenditure of the company that year ?

- 1) 29 : 30 2) 29 : 20 3) 29 : 25
4) Can't be determined 5) None of these

2. If the total expenditure of the company X in 2009 was Rs. 1,720 Lakh, What was the total income in Rs. Lakh of the company in the same year?

- 1) Rs, 860 lakh 2) Rs, 1,760 lakh
3) Rs, 2,580 lakh 4) Can't be determined
5) None of these

3. What was the ratio of profit percent earned by company X, Y and Z in the year 2013 ?

- 1) 13 : 10 : 1 2) 13 : 1 : 10 3) 13 : 11 : 10
4) Can't be determined 5) None of these

Data Interpretation Part-1

4. If the profit earned by Company X in the year 2008 and 2010 was Rs.312 lakh and Rs. 225 lakh respectively, what was the total expenditure of the company in both the years ?

- 1) Rs, 3,060 lakh 2) Rs, 1,560 lakh
3) Rs, 1,500 lakh 4) Can't be determined
5) None of these

5. What is the difference (in Rs. Lakh) between the expenditure of the company X and company Z in the year 2013?

- 1) 15 2) 50 3) 65
4) Can't be determined 5) None of these

VII. Direction (1-5): Study the following table carefully to answer the questions that follow:

Production of tyres by a tyre manufacturing company in one week		
Day	No. of Tyres Produced	Daily Production Cost in (Rs. Lakh)
Monday	150	3.75
Tuesday	100	6.00
Wednesday	90	4.95
Thursday	120	5.40
Friday	400	6.00
Saturday	360	6.48

1. What is the approximate average cost per tyre produced in the given week?

- 1) Rs. 3,693 2) Rs. 3,633
3) Rs. 4,364 4) Rs. 3,893
5) none of these

2. In which of the following pair of days was the difference between the production cost per tyre is Rs. 500?

- 1) Monday- Saturday 2) Tuesday- Friday

- 3) Tuesday -Wednesday 4) Data Inadequate
5) None of these

3. Cost per tyre manufacture on Thursday is what percent of the cost per tyre manufactured on Tuesday?

- 1) 25% 2) 75% 3) 85%
4) 90% 5) none of these

4. For which day the production cost per tyre is the highest?

- 1) Tuesday 2) Wednesday 3) Thursday
4) Data inadequate 5) None of these

5. In which of the following pair of days is the ratio of the production cost per tyre is 5 : 6?

- 1) Monday- Saturday 2) Friday-Saturday
3) Tuesday -Wednesday 4) Data Inadequate
5) None of these

VIII. Directions (Q. 1 - 5): Study the graphs carefully to answer the questions (in lakh) that follow:

The following table gives the percentage distribution of population of five states, A, B, C, D and E on the basis of poverty line and also on the basis of their gender.

State	Percentage of population below poverty line	Proportions of Male and Female	
		Below poverty line	Above poverty line
		M : F	M : F
A	10	1 : 3	2 : 1
B	20	1 : 1	1 : 1
C	25	2 : 3	5 : 1
D	40	3 : 1	1 : 2
E	30	1 : 5	3 : 4

Data Interpretation Part-1

1. If the total population of State C is 620 lakh, what is the total male population above poverty line in State C?

- 1) 150 2) 225 3) 280
4) 387.5 5) none of these

2. If the population of male below poverty line for State A is 10 lakh, what is the total population below poverty line in State A?

- 1) 40 2) 35 3) 30
4) 25 5) none of these

3. What will be the male population above poverty line for State D if the female population above poverty line for State D is 336 lakh?

- 1) 168 2) 220 3) 255
4) 310 5) none of these

4. If the total population of State B is 550 lakh, total female population below poverty line in State B is what % of male population above poverty line in same State?

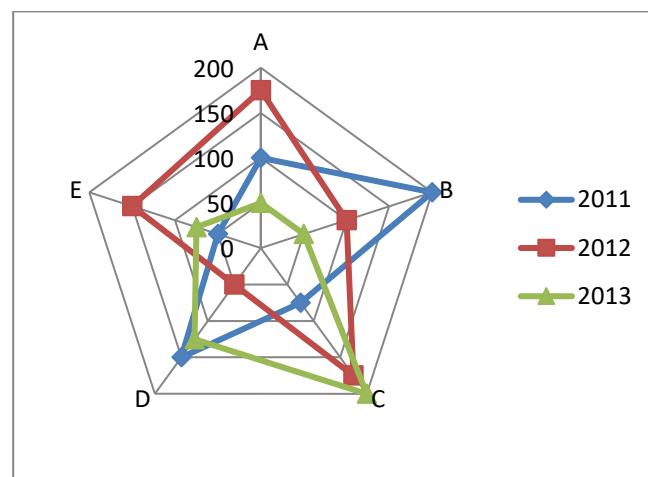

- 1) 20% 2) 25% 3) 30%
4) 35% 5) none of these

5. If the total population of State E is 930 lakh, what is the population above poverty line in State E?

- 1) 661 2) 651 3) 644 4) 635 5) none of these

IX. Directions (Q.1-5) Study the following radar-graph carefully and answer the given questions.

Number of officers who joined five different branches of a company in three years

1. No. of officers who joined Branch A in 2013 is approximately what percent of total number of officers who joined Branch A in all the given years ?

- 1) 33 % 2) 25 % 3) 15%
4) 13% 5) none of these

2. Which Branch has been joined by least number of officers in all the three years together ?

- 1) A 2) B 3) C 4) D 5) E

3. If the company is planning to transfer 10% of the newly joined officers who joined the company in 2013, to its foreign branch, how many employees is going to be posted at company's foreign branch in the year 2014?

- 1) 10 2) 25 3) 50
4) Data Inadequate 5) none of these

4. What is the ratio of no. of officers who joined Branch C to the no. of officers who joined Branch E in all the given years.?

- 1) 3 : 7 2) 12 : 25 3) 11 : 18
4) 18 : 11 5) none of these

5. If the company has sent 15% of the newly recruited officers who joined Branch B, D and E in 2013 for training, What is the number of female officers chosen for the training programme ?

- 1) 30 2) 25 3) 20

Data Interpretation Part-1

4) Data Inadequate
these

5)none of

3. What is the difference between the net profit of Company A and that of Company C?

1) Rs.118.40 lakh 2)Rs. 11.84 lakh 3) Rs. 1.18 lakh

4) Rs. 1.84 lakh 5) none of these

4. What is the ratio of machines sold by Company D and Company E?

1) 63 : 260 2) 230 : 63

3) 36 : 130 4) 44 : 95

5) None of these

5. What is the total profit earned by Company D?

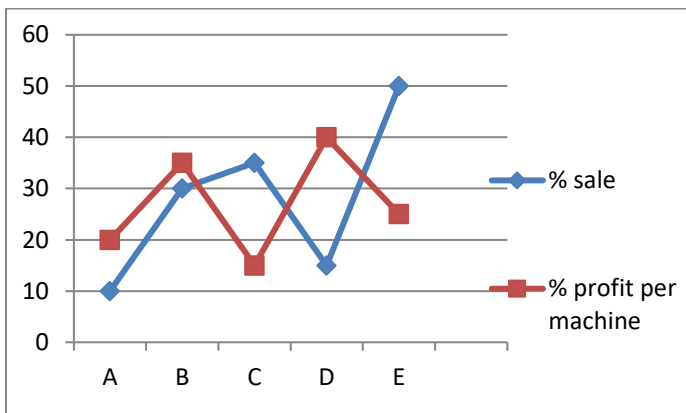

1) Rs.220.50 Lakh 2) Rs.2,205 lakh 3) Rs. 225 lakh

4) Rs.2,205 Lakh 5) None of these

X. Directions (Q1-5): Following table shows the total number of Machines manufactured by five different companies and the cost price of the machines.

Company	No of Machines Manufactured	Cost Price per Machines (in Rs)
A	10000	50,000
B	12000	45,000
C	8000	52,000
D	10500	35,000
E	13000	32,500

The line graph shows the percentage of manufactured machines sold and percentage profit on each machine for all the five companies.

1. What is the average production of machines by all the five companies together?

1)10,500 2)17,000
3)10,700

4)12,050 5)none of these

2. What is the selling price of one machine manufactured by Company C?

1)58900 2)59800
3)58980

4)58090 5)none of these
