5. 2

Solution:

From (iv), (i) and (iii), there will be two cases:

Camel _____ Horse Elephant _____ _____ Bear

Case 1.

Camel Horse _____ Elephant _____ Bear _____

Case 2.

From (v), again there will be two subcases:

Camel Dog Horse Elephant Goat _____ Bear

Case 1.

Camel _____ Horse Elephant _____ Dog Goat Bear

Case 1.a.

Camel Horse Dog Elephant Goat _____ Bear _____

Case 2.

Camel Horse _____ Elephant Dog Goat Bear _____

Case 2. a.

From (ii) and (vi),

Case 1 and 1.a. will get discarded as the number of animals sitting between Fox and Dog is two.

Camel Dog Horse _____ Elephant Goat _____ Bear

Case 1.

Camel _____ Horse Elephant _____ Dog Goat Bear

Case 1.a.

Case 2 will get discarded as Cat does not sit at any extreme end of the row.

Camel Horse Dog Elephant Goat Fox Bear Cat

Case 2.

Camel Horse Cat Elephant Dog Goat Bear Fox

Case 2. a.

Final arrangement as shown below:

Camel Horse Cat Elephant Dog Goat Bear Fox

XIV

1. 1

2. 2

3. 4

4. 2

5. 3

Solution:

There are seven places:

1234567

From (i), (ii) and (iii), there are two possibilities:

(a) (Shivansh) Nano(Animesh) Innova

(b) 1st option. (Shivansh) Innova Nano(Animesh)

Or

2nd option (Shivansh) Nano(Animesh) Innova

Possibility (a) is violating (iv) because if Santro is not parked beside Nano, Santro can be either at place no.1 or 2. But as Santro is parked third to the right of Tarun's car, Santro cannot be at place 1, 2 and 3.

Possibility (b) 1st option is also violating (iv) because Santro is left with only one place i.e. 4, which is third to the right of the car owned by Shivansh, hence cannot be third to the right of Tarun's car.

Lets take possibility (b) 2nd option.

From (iv),

(Shivansh) Nano(Animesh)(Tarun)Innova Santro

From (vi),

Pajero(Shiv.)SwiftNano(Anim.)(Tarun)Innova Santro

Pajero(Shiv.)SwiftNano(Anim.) Audi(Tarun)Innova (Kaushik)Santro

From (vii),

Pajero(Shiv.)Swift(Prahlad)Nano(Anim.) Audi(Tarun)Innova(Vyomkesh) Ford(Kaushik)Santro(Kartik)

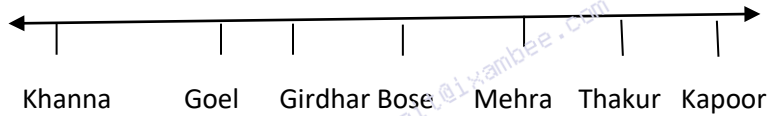

Pajero	Swift	Nano	Audi	Innova	Ford	Santro
Shivansh	Prahlad	Animesh	Tarun	Vyomkesh	Kaushik	Kartik

4. 3
5. 2

Solution:

Writing case 1 above the line and case 2 below the line.

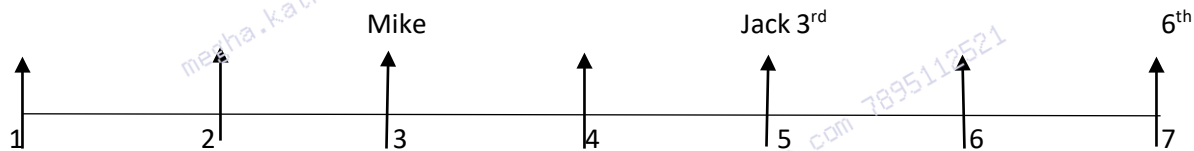

Since Jai is not a neighbor of Jack and the person living on 1st floor sits third to the right of Jai, In case 2, No appropriate position for the person living on 1st floor can be obtained. Thus, case 2 discarded.

Answer_Assignment 1_Level 1_Seating Arrangement

In case 1, if Jack is positioned at 1, Jai can only be seated at 4, 5 or 6. Even if Jai sits at 4, the position third to the right of Jai, which is to be occupied by the one living on 1st floor is already occupied. Thus, Jack cannot sit at 1.

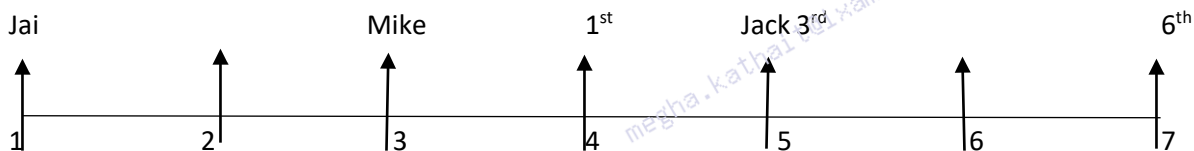

Thus, Jack will sit at 5.

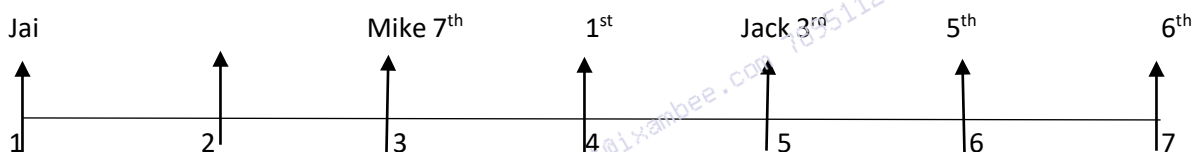

Now, Jai can sit only at either 1 or 2 because Jai and Jack are not immediate neighbors.

If Jai is seated at 2, position third to left of Jai should be occupied by the one living on the first floor. But, it is already occupied by Jack living on 3rd floor, Thus, Jai cannot be seated at 2.

Thus, Jai can only be seated at 1.

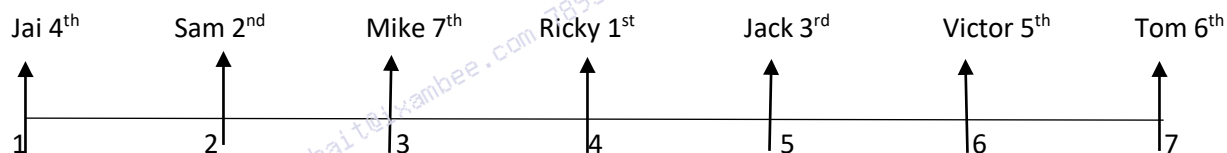

One who lives on 5th floor sits third to the right of one who lives on the 7th floor. The only possibility is when Mike lives on 7th floor and the one who lives on 7th floor is seated at 6.

Only one person lives between Ricky and the person who lives on the 2nd floor. Hence, Ricky sits at 4 and the person who lives on second floor sits at 2. Also, Victor and Tom are immediate neighbours of each other. Victor does not live on the 6th floor. Thus, Victor sits at 6 and Tom at 7.

Filling in the missing entries.

Answer_Assignment 1_Level 1_Seating Arrangement

XVIII.

1. 2
2. 3
3. 4
4. 4
5. 3

SOLUTION:

From (ii) and (iii), Meenakshi, who is facing north is at place no. 5 and Deepali who is facing south is at place no. 8.
 From (i) & (iv), since Riya is at one of the extreme ends and Prakash is second to the left of Riya, it is clear that she is at extreme left end i.e. place no. 1 and Prakash is at place no. 3. It is also clear that Preeti is facing north and at place no. 4.
 From (v), since, Harsh is not an immediate neighbour of Prakash, it is clear that Harsh is facing south and is at place no. 6.

Riya(S)	___	Prakash	Preeti(N)	Meenakshi(N)	Harsh(S)	___	Deepali(S)	___
1	2	3	4	5	6	7	8	9

Statement (iii), we can say that Aditi is facing north and at place no. 2.

From (vi), Shivani and Lokesh are at place no. 9 and 7 respectively. Since, Shivani is facing south, and it is given that only four persons are facing south, it is clear that Prakash and Lokesh are facing north.

Final arrangement will be as follows:

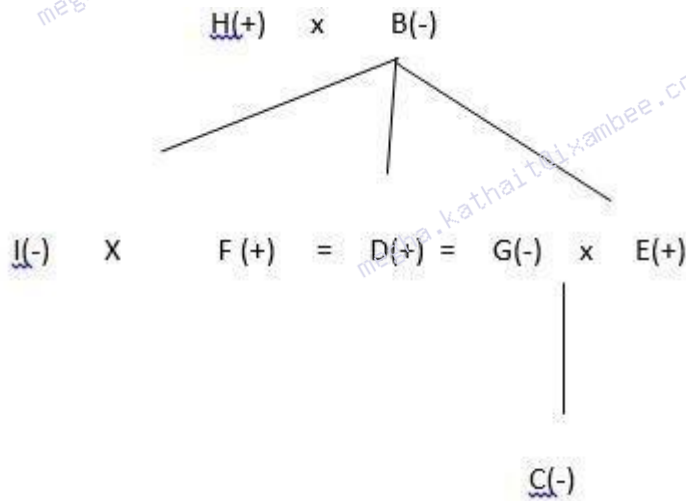

Riya(S)	Aditi (N)	Prakash(N)	Preeti(N)	Meenakshi(N)	Harsh(S)	Lokesh(N)	Deepali(S)	Shivani(S)
1	2	3	4	5	6	7	8	9

XIX

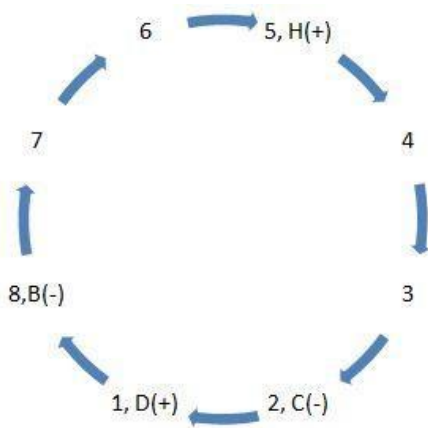

1. 4
2. 4
- 3.1, F's position will remain unchanged
4. 3
5. 4

Solution: To solve this puzzle, first we have to make a family tree.

Answer_Assignment 1_Level 1_Seating Arrangement

From (i), if D sits at place no. 1, then H will sit at place no.5. D's mother B can sit at either place no. 2 or 8. But from statement (iii), it is clear that C will sit at place no.2, so B will sit at place no.8.

Answer_Assignment 1_Level 1_Seating Arrangement

From (ii), it is clear that G and E can sit either at place no. 3 or 7. If G sits at place no. 3, then I will sit at place no.4, but from statement (v) , I is sitting second to the right of her husband, F. So, S cannot sit at place no. 4. She will sit at place no. 6 and F will sit at place no. 4. G will sit at place no. 7 and E will sit at place no.3.
