

Direction Distance 1

Directions(Q.1-2): Answer the questions based on the information given below.

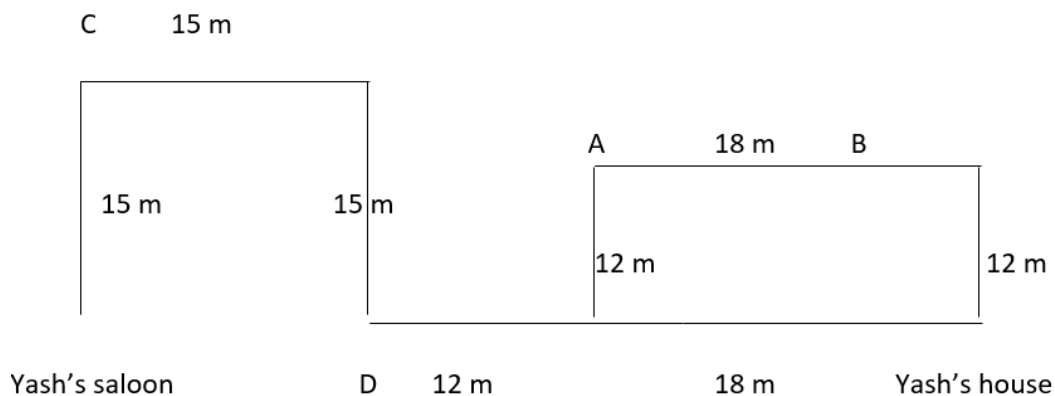

Yash started his journey from his saloon to his house. He walks 15m towards in north direction and stops at Point C. From there, he takes two consecutive right turns of 15m each and stops at Point D. From there, he takes two consecutive left turns of 12m each and stops at Point A. From there, he walks 18m to his right and stops at Point B. Yash's house is in south of Point B and east of Point D.

1. What is the shortest distance between Yash's Saloon and Yash's house?

- 1) 55m
- 2) 47m
- 3) 45m
- 4) 57m
- 5) None of the above

Ans: 3

Shortest distance between Yash's Saloon and Yash's house = $18 + 12 + 15 = 45$ m.

2. Point C is in which direction with respect of Point B?

- 1) West
- 2) SouthWest
- 3) NorthWest
- 4) North-East

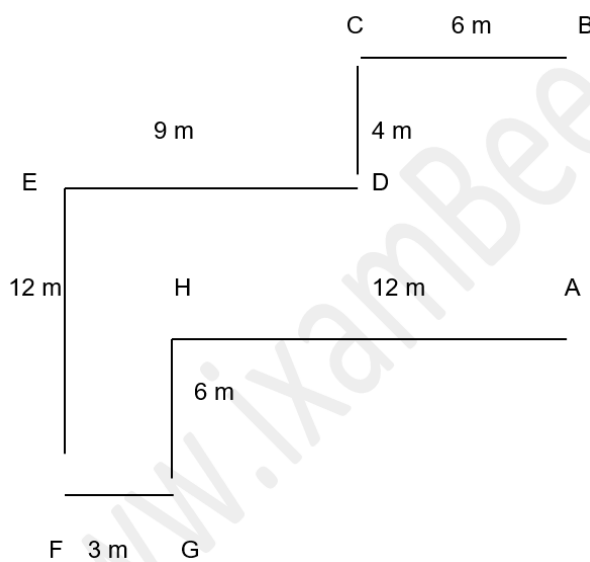

5) None of the above

Ans: 3

Direction (Q.3-4): Study the following information carefully and answer the questions given below.

A boy from point B walks towards the west for 6 m and turns to his left at point C, from where he walks for 4 m and reaches point D. Then, he turns to his right and walks for 9 m to reach point E where he turns to his left. Then he walks for 12 m and reaches point F. He walks for 3 m after taking a left turn and reaches point G. Then he walks for 6 m towards the north to reach point H from where he turns to his right and walks for 12 m to reach point A.

Solution:

3. What is the shortest distance between points B and A?

- 1) 16 m
- 2) 12 m
- 3) 7 m
- 4) 10 m
- 5) None of these

Ans: 4

Shortest distance between points B and A = $6 + 4 = 10$ m.

4. If point W is exactly in the middle of points H and A, then what is the direction of point B with respect to point W?

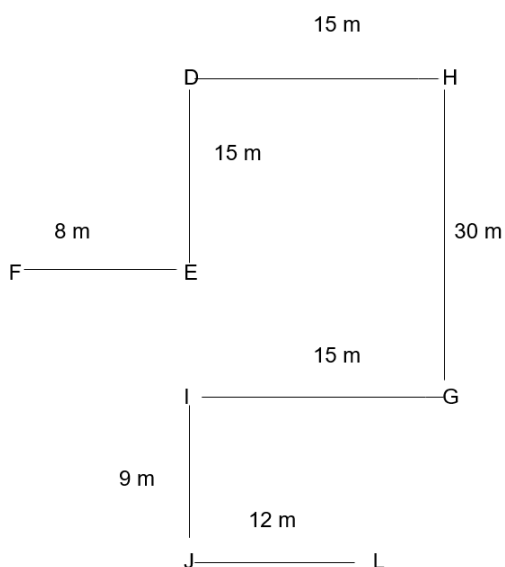

- 1) North
- 2) Southwest
- 3) Northeast
- 4) South
- 5) None of the above

Ans: 3

Directions (5-7): These questions are based on the information given below.

Eight persons D, E, F, G, H, I, J, and L are standing in such way that F is 8 m apart from E towards West. E is 15 m South with respect to D. D is 15 m towards West with respect to H. G is 30 m towards South with respect to H. I is 9 m apart from J towards North. L is 12 m towards East with respect to J. I is 15 m towards West with respect to G.

Solution:

5. In which direction E standing with respect to I?

- 1) North-West
- 2) North
- 3) North-East
- 4) Cannot be determined
- 5) South

Ans: 2

6. If one more person P is standing towards South-West with respect to G, then in which direction is L, standing with respect to P?

- 1) South-West
- 2) North-East
- 3) North-West
- 4) Cannot be determined
- 5) South-east

Ans: 4

As total distance between P and G is not given, so this question cannot be determined.

7. What is the shortest direction between I and L?

- 1) 11m
- 2) 13m
- 3) 15m
- 4) 19m
- 5) 8m

Ans: 3

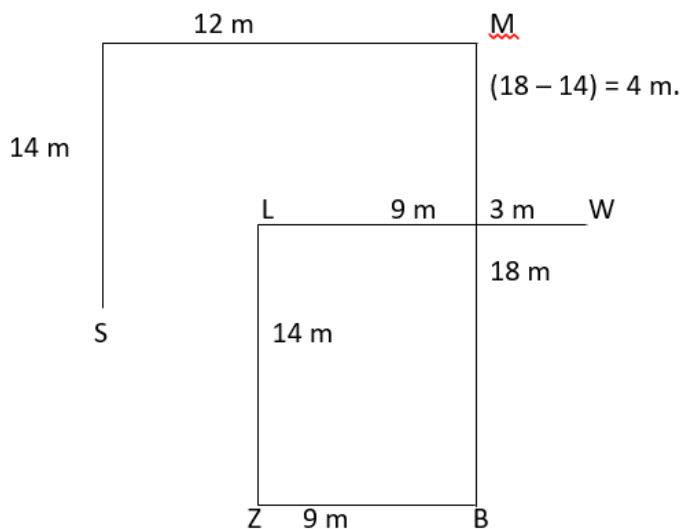

Shortest direction between I and L = $\sqrt{9^2 + 12^2} = \sqrt{81 + 144} = \sqrt{225} = 15$ m.

Directions (Q.8-10): Study the information carefully and answer the questions given below.

A person start his journey from point S, He walks 14 m in north and take his right and walks 12m to reach at point M. Now he start walking towards south direction and walks 25m to reach point B. Now he takes his right turn and walks 9 m to reach point Z. From point Z, he start walking towards north direction and walks 14 m to reach point L. Now he takes right turn and walks 12 m to reach at point W.

Solution:

12. In which direction point B with respect to point W?

- 1) North-west
- 2) North-east
- 3) South-west
- 4) South-east
- 5) None of these

Ans: 3

13. What is the shortest distance between point W and point M?

- 1) 8m
- 2) 5m
- 3) 7m

4) 6m

5) None of these

Ans: 2

Shortest distance between point W and point M = $\sqrt{3^2 + 4^2} = \sqrt{9 + 16} = \sqrt{25} = 5$ m.

14. What is the shortest distance between point S and point B?

1) 11m

2) $4\sqrt{10}$ m

3) 14m

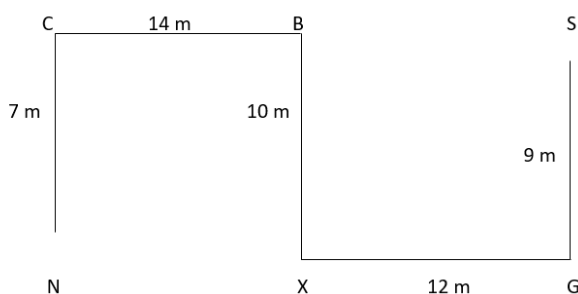

4) 8m

5) None of these

Directions (11-12): Study the information carefully and answer the questions given below.

Vandana starts her journey from point S, walks 9 m towards south to reach at point G, then she takes a right turn and walks for 12 m to reach point X. From point X she takes a right turn and walks for 10 m to reach at point B. From point B she takes a left turn and walks 14m to reach at point C, then takes a left turn again and walks 7 m to reach point N.

Solution:

11. What is the shortest distance between point X and S?

(1) 15 m

(2) 18 m

(3) 10 m

(4) 20 m

(5) None of these

Ans: 1

Shortest distance = $\sqrt{12^2 + 9^2} = \sqrt{144 + 81} = \sqrt{225} = 15$ m.

12. In which direction point N with respect of G?

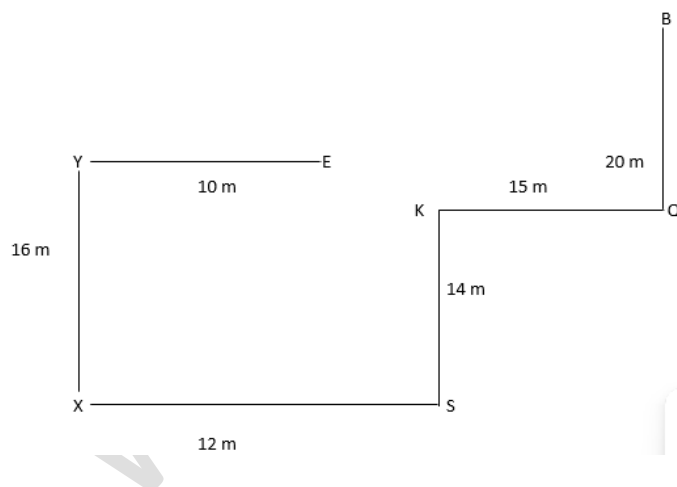

- (1) North-west
- (2) South-west
- (3) North
- (4) East
- (5) North-east

Ans: 1

Directions (13-14): Study the information carefully and answer the questions given below.

Priyank starts his journey from point E, walks 10 m towards west to reach at point Y, then he starts walking in south to reach 16 m to reach point X. From point X he takes a left turn and walks 12 m to reach at point S, From point S, he start walking in north for 14 m to reach at point K, then takes a right turn and walks 15 m to reach point Q. From point Q, he walks 20 m in north direction and reach at point B.

Solution:

13. What is the shortest distance between B and K?

- 1) 22 m
- 2) 20 m
- 3) 25 m

4) 26 m

5) None of these

Ans: 3

Shortest distance between B and K = $\sqrt{15^2 + 20^2} = \sqrt{225 + 400} = \sqrt{625} = 25$ m.

14. In which direction point Y with respect of S?

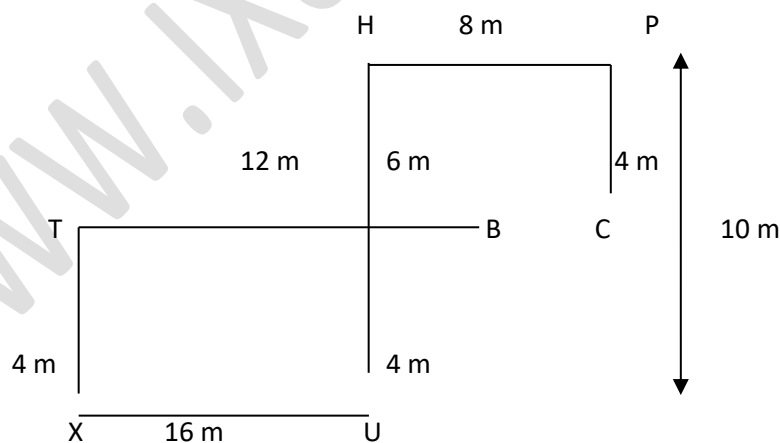

- (1) North-east
- (2) South
- (3) North-West
- (4) West
- (5) None of these

Ans: 3

Directions (15-16): Study the following information carefully and answer the given questions:

Umesh starts his journey from point B, walks 12 m towards west to reach at point T, then takes a left turn and walks for 4 m to reach point X. From point X he takes a left turn and walks for 16 m to reach at point U. From point U, he takes a left turn and walks 10 m to reach at point H, then takes a right turn and walks 8 m to reach point P. From point P, He walks 4 m in south direction and reached point C.

Solution:

15. If point O is 8 m west of point C then in which direction point O with respect to point U?

- (1) South
- (2) North-west
- (3) South-east
- (4) East
- (5) North

Ans: 5

16. In which direction point P with respect of T?

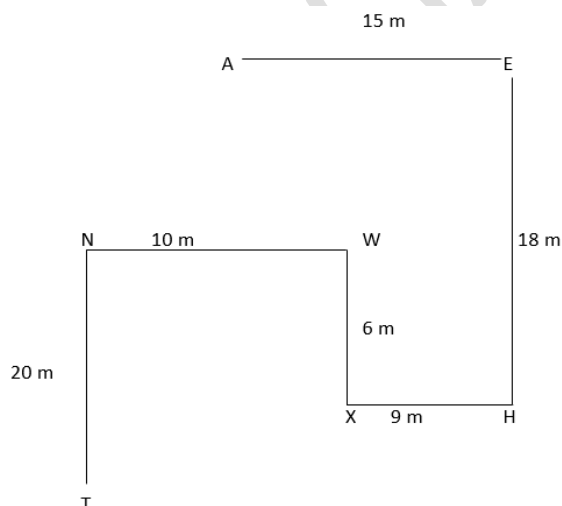

- (1) North
- (2) South-west
- (3) North-east
- (4) East
- (5) South-east

Ans: 3

Directions (17-19): Study the information carefully and answer the questions given below.

A person starts walking in north direction from point T, after walking 20 m he reached at point N, then he takes right turn and walks 10 m to reach at point W. After that he walks in south direction and walks 6 m to reach at point X. Point H is 9 m east of point X. Point E is 18 m north of H. Point A is 15 m west of E.

Solution:

17. What is the direction of E with respect to person's initial position?

- (1) North
- (2) West
- (3) South-West
- (4) North-East
- (5) None of these

Ans: 4

18. What is the shortest distance between W and E?

- (1) 15 m
- (2) 18 m
- (3) 20 m
- (4) 14 m
- (5) 12 m

Ans: 1

Shortest distance between W and E = $\sqrt{9^2 + 12^2} = \sqrt{81 + 144} = \sqrt{225} = 15$ m.

19. What is the direction of T with respect to H?

- (1) South-East
- (2) North-West
- (3) South-West
- (4) East
- (5) None of these

Ans: 3
