

Inequality 1

In each of the following questions, the relationship between different elements is shown in the statements followed by two conclusions. Find the conclusion which is true.

Statements:

$$A < G = B \leq V; C \leq O = V; C = R > T, B > Z \leq W = M$$

Conclusions:

I) $A < M$

II) $O > A$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Either conclusion I or II is true
- d. Neither conclusion I nor II is true
- e. Both conclusions I and II are true

Answer: 2

I). $A < M$ ($A < G = B > Z \leq W = M$) $\rightarrow$ False

II). $O > A$ ($A < G = B \leq V = O$) $\rightarrow$ True

Only conclusion II is true

2. Question

Statements:

$$Y < T < C = X; Y \leq A < N; H > S > T > N, C \geq L < Z \geq Q$$

Conclusions:

I) $A \geq Q$

II) $N > C$

- a. Only conclusion I is true
- c. Only conclusion II is true
- c. Either conclusion I or II is true

Inequality 1

d. Neither conclusion I nor II is true

e. Both conclusions I and II are true

Answer: 4

I). $A \geq Q (A \geq Y < T < C \geq L < Z \geq Q) \rightarrow \text{False}$

II). $N > C (C > T > Y \leq A < N) \rightarrow \text{False}$

Neither conclusion I nor II is true

3. Question

Statements:

$A > O < T = F; A \leq G = Y \leq N; Y \geq P > W$

Conclusions:

I) $Y \geq F$

II) $O < N$

a. Only conclusion I is true

b. Only conclusion II is true

c. Either conclusion I or II is true

d. Neither conclusion I nor II is true

e. Both conclusions I and II are true

Answer: B

I). $Y \geq F (Y = G \geq A > O < T = F) \rightarrow \text{False}$

II). $O < N (O < A \leq G = Y \leq N) \rightarrow \text{True}$

Only conclusion II is true

4. Questions

Inequality 1

Statements:

$$C < Z < A \leq O; Y < O; K \leq B < E < Y$$

Conclusions:

- I). $C > E$
- II). $A \leq B$
- a. Only conclusion I is true.
- b. Only conclusion II is true.
- c. Either conclusion I or II is true.
- d. Neither conclusion I nor II is true.
- e. Both conclusions I and II are true.

Answer: 4

- I). $C > E (C < Z < A \leq O > Y > E) \rightarrow \text{False}$
- II). $A \leq B (A \leq O > Y > E > B) \rightarrow \text{False}$

Neither conclusion I nor II is true

5. Statements:

$$A \geq Z > W > N > G; S > T < P; C > E = S < Y \leq Z$$

Conclusions:

- I). $A > T$
- II). $P < W$
- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Either conclusion I or II is true
- d. Neither conclusion I nor II is true
- e. Both conclusions I and II are true

Inequality 1

Answer: 1

$$A \geq Z > W > N > G; S > T < P; C > E = S < Y \leq Z$$

Conclusion:

I). $A > T (A \geq Z \geq Y > S > T) \Rightarrow \text{True}$

II). $P < W (P > T < S < Y \leq Z > W) \Rightarrow \text{False}$

Hence, option A is correct.

6. Questions

Statements:

$$A > F > Z; X = H > W \leq U, Q < S = P < R; L > F = Q \geq X$$

Conclusions:

I). $A > W$

II). $R < L$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Either conclusion I or II is true
- d. Neither conclusion I nor II is true
- e. Both conclusions I and II are true

Answer: 1

I). $A > W (A > F = Q \geq X = H > W) \Rightarrow \text{True}$

II). $R < L (R > P = S > Q = F < L) \Rightarrow \text{False}$

Hence, option A is correct.

7. Questions

Statements:

$$P \geq W < L < R; B \geq F > W = M; D \geq O = F > N$$

Inequality 1

Conclusions:

I). $R < B$

II). $D > M$

- a. Only Conclusion I is true
- b. Only Conclusion II is true
- c. Both Conclusions I and II are true
- d. Either Conclusion I or II is true
- f. Neither Conclusion I nor II is true

Answer: 2

I). $R > L > W < F \leq B$ --> False

II). $D > M$ ($D \geq O = F > W = M$) --> True

8. Questions

Statements:

$A \geq B \geq C = P$; $C > D = S \geq T$; $E \leq W < S$;

Conclusions:

I). $E < P$

II). $A > W$

- a. Only Conclusion I is true
- b. Only Conclusion II is true
- c. Both Conclusions I and II are true
- d. Either Conclusion I or II is true
- e. Neither Conclusion I nor II is true

Answer: 3

- I). $E < P (E \leq W < S = D < C = P) \rightarrow \text{True}$
- II). $A > W (A \geq B \geq C > D = S > W) \rightarrow \text{True}$

9. Questions

Statements:

$A \geq B > C > L = D; N < B \leq Z \leq O; H > D < U;$

Conclusions:

- I). $Z > D$
- II). $O \geq H$
- a. Only Conclusion I is true
- b. Only Conclusion II is true
- c. Both Conclusions I and II are true
- d. Either Conclusion I or II is true
- e. Neither Conclusion I nor II is true

Answer: 1

- I). $Z > D (Z \geq B > C > L = D) \rightarrow \text{True}$
- II). $O \geq H (O \geq Z \geq B > C > L = D < H) \rightarrow \text{False}$

10. Questions

Statements:

$O = Z \leq E < M; H \geq T > Y \geq C; Y = X \leq Z; X \geq W > F < P$

Conclusions:

- I). $P > C$
- II). $H > F$
- a. Only Conclusion I is true

Inequality 1

- b. Only Conclusion II is true
- c. Both Conclusion I and II are true
- d. Either Conclusion I or II is true
- e. Neither Conclusion I nor II is true

Answer: 2

I). $P > C (P > F < W \leq X = Y \geq C) \rightarrow \text{False}$

II). $H > F (H \geq T > Y = X \geq W > F) \rightarrow \text{True}$

Below questions consist of the relations between the different elements shown in the statements followed by some conclusions. Study the following information carefully and answer the below questions.

Statements: $A > B = C \leq P < J, F \geq R = U < P, R > W \leq T < D$

Conclusions:

I). $A > R$

II). $W < J$

III). $C \leq T$

- a. Both I and II follow
- b. Only III follows
- c. Both I and III follow
- d. Only II follows
- e. None

Answer: 4

I). $A > R (A > B = C \leq P > U = R) \rightarrow \text{False}$

II). $W < J (W < R = U < P < J) \rightarrow \text{True}$

III). $C \leq T (C \leq P > U = R > W \leq T) \rightarrow \text{False}$

Thus, only conclusion II follows

2. Questions

Statements: $Y < O = F > T \geq M < H$, $T > Z \geq P$, $O \leq W < N$, $M = B \leq E$

Conclusions:

I). $E > O$

II). $W \geq P$

III). $Y \leq E$

- a. Both I and II follow
- b. Either I or III follows
- c. Both II and III follow
- d. Only II follows
- e. None follow

Answer: 5

I). $E > O$ ($Y < O = F > T \geq M = B \leq E$) $\rightarrow$ False

II). $W \geq P$ ($W \geq O = F > T > Z \geq P$) $\rightarrow$ False

III). $Y \leq E$ ($Y < O = F > T \geq M = B \leq E$) $\rightarrow$ False

Thus, none of the conclusion follows

3. Questions

Statements: $P > S = N \leq A < Q \leq W$, $A > R = F \geq B$

Conclusions:

I). $N > F$

II). $R \geq S$

III). $W \geq B$

Inequality 1

- a. Both II and III follow
- b. Either I or II follows
- c. Both I and III follow
- p. Only II follows
- e. None follow

Answer: B

- I). $N > F (S = N \leq A > R = F) \rightarrow \text{False}$
- II). $R \geq S (S = N \leq A > R = F) \rightarrow \text{False}$
- III). $W \geq B (W \geq Q > A > R = F \geq B) \rightarrow \text{False}$

After combining both conclusions I and II, we have either I or II follows.

4. Questions

Statements: $A > Q \geq O < B \leq D < P, B \geq W > H \geq V, K < R \leq N > D$

Conclusions:

- I). $A > H$
- II). $O < K$
- III). $P > H$

- a. Both II and III follow
- a. Only II follows
- c. Both I and III follow
- d. Only III follows
- e. None follow

Answer: 4

- I). $A > H (A > Q \geq O < B \geq W > H) \rightarrow \text{False}$
- II). $O < K (O < B \leq D < N \geq R > K) \rightarrow \text{False}$

III). $P > H (P > D \geq B \geq W > H) \rightarrow \text{True}$

Hence, conclusion III follows

5. Questions

Statements: $A = G < W \geq O > F, O \geq T > P \leq R, P > Z = S \geq L$

Conclusions:

I). $A > P$

II). $S \leq W$

III). $P \geq G$

- a. Both II and III follow
- a. Only II follows
- c. Either I or III follow
- d. Only III follows
- e. None follow

Answer: 3

I). $A > P (A = G < W \geq O \geq T > P) \rightarrow \text{False}$

II). $S \leq W (S = Z < P < T \leq O \leq W) \rightarrow \text{False}$

III). $P \geq G (A = G < W \geq O \geq T > P) \rightarrow \text{False}$

After combining both conclusions I and III, we have either I or III follows

6. Questions

In the given question, the relationship between different elements is shown in the statements followed by three conclusions. Find the conclusion which is definitely true.

Statement:

$C \geq H = Y < A, H > W = O \leq F, Z \geq P > Y$

Conclusion:

I). $A > O$

Inequality 1

II). $W < Z$

III). $C > P$

- a. Both I and III follow
- c. Only II follows
- c. Both I and II follow
- d. Only I follows
- e. None follows

Answer: C

From I. $A > O$ ($A > Y = H > W = O$) $\rightarrow$ True

From II. $W < Z$ ($Z \geq P > Y = H > W$) $\rightarrow$ True

From III. $C > P$ ($C \geq H = Y < P$) $\rightarrow$ False

Thus, both I and II follows

7. Questions

Statement:

$Z > A = M \leq Q, C > P \geq N < Q, N > S = B > H$

Conclusion:

I). $A < C$

II). $M \geq C$

III). $Z > B$

- a. Both II and III follows
- b. Either I or II follows
- c. None follows
- d. Only III follows
- e. Both I and III follows

Answer: 2

From I. $A < C$ ($A = M \leq Q > N \leq P < C$) $\rightarrow$ False

From II. $M \geq C$ ($A = M \leq Q > N \leq P < C$) $\rightarrow$ False

From III. $Z > B$ ($Z > A = M \leq Q > N > S = B$) $\rightarrow$ False

Clearly, either I or II follows

8. Questions

Statement:

$A > O = B \leq M = Q > W \geq G, E \geq K < R = G$

Conclusion:

I). $O < R$

II). $B \geq R$

III). $M \leq E$

a. Both II and III follows

a. Either I or II follows

c. None follows

d. Only III follows

e. Both III and either I or II follows

Answer: 2

From I. $O < R$ ($O = B \leq M = Q > W \geq G = R$) $\rightarrow$ False

From II. $B \geq R$ ($O = B \leq M = Q > W \geq G = R$) $\rightarrow$ False

From III. $M \leq E$ ($M = Q > W \geq G = R > K \leq E$) $\rightarrow$ False

Clearly, either I or II follows

9. Questions

Inequality 1

Study the following information carefully and answer the below questions.

Statement: $A \geq J = O < L, J > W = Q \leq F, Z \geq P > O$

Conclusion:

I. $L > Q$

II. $W < Z$

III. $A > P$

- a. Both I and III follow
- a. Only II follows
- c. Both I and II follow
- d. Only I follows
- e. None follows

Answer: 3

From I. $L > Q$ ($L > O = J > W = Q$) $\rightarrow$ True

From II. $W < Z$ ($Z \geq P > O = J > W$) $\rightarrow$ True

From III. $A > P$ ($A \geq J = O < P$) $\rightarrow$ False

Thus, both I and II follows

10. Questions

Statement: $A > L = O \leq Z, N > P \geq W < Z, W > S = B > H$

Conclusion:

I. $L < N$

II. $O \geq N$

III. $A > B$

- a. Both II and III follows
- b. Either I or II follows
- c. None follows

Inequality 1

d. Only III follows

e. Both I and III follows

Answer: 2

From I. $L < N$ ($L = O \leq Z > W \leq P < N$) $\rightarrow$ False

From II. $O \geq N$ ($L = O \leq Z > W \leq P < N$) $\rightarrow$ False

From III. $A > B$ ($A > L = O \leq Z > W > S = B$) $\rightarrow$ False

Clearly, either I or II follows
