

Order & Ranking

Direction (1-5): Answer the questions based on the information given below.

Seven persons A, B, C, D, E, F, G and H are different weight persons but necessarily in the same order.

D is heavier than B, who is not lighter than E and A. H is heavier than E but not lighter than C. Number of person is heavier than E as same as lighter than E. B is lighter than H, who is not the heaviest person.

Two person are heavier between B and F, who is not heavier than A.

1) Who is third lightest person in the group?

- a) F
- b) A
- c) C
- d) E
- e) B

Ans-2

2) How many person are weight between H and F?

- a) Two
- b) Four
- c) One
- d) Three
- e) None

Ans-4

3) If weight of E and F are 72 and 60 respectively then what is the possible weight of C?

- a) 65
- b) 67
- c) 58
- d) 61
- e) 70

Ans-3

4) Four of them following are in the same group, which is not belongs to that group?

- a) H B
- b) A F
- c) F C
- d) A H
- e) E B

Ans-4

5) Which of the following pair is lightest and heaviest person in the group?

- a) D C
- b) C H
- c) D A
- d) D F
- e) C B

Ans-1

Solution(1-5):

Final arrangement as follows,

$D > H > B > E > A > F > C$

Direction (6-10): Answer the questions based on the information given below.

Eight persons J, K, L, M, N, O, P and Q are different height person but not necessarily in the same order.

L is taller than N and shorter than Q, who is not the tallest person. N is taller than O, who is the shortest person. Number of person are taller than before P as same as number of person are shorter than L. Sum of the height of J and P is 328 cm. Fourth tallest person height is 168cm. M is taller than J and P, who is 160 cm height. P is taller than only two person. N and O are not neighbours.

6) Who is fourth shortest person in the group?

a) O

b) J

c) Q

d) N

e) L

Ans-4

7) If height of O is 142 cm. what is sum of the height of J and O?

a) 200

b) 310

c) 220

d) Cannot be determined

e) None of these

Ans-2

8) How many persons are shorter than K?

a) Five

b) Four

c) One

d) Three

e) Two

Ans-3

9) Which of the following statement is true with respect to K?

a) Fourth shortest person

b) Shorter than O

c) Possible height is 155 cm

d) Shortest person

e) All are false

Ans-3

10) Who is the tallest person in the group?

a) P

b) L

c) N

d) O

e) M

Ans-5

Solution (6-10):

Final arrangement as follows,

$M > Q > L > J (168) > N > P (160) > K > O$

Direction (11-15): Answer the questions based on the information given below.

Seven persons namely P, Q, R, S, T, U and V are joining the work in the different month starting from January to July but not necessarily in the same order.

P joined the work before V and after S. Q joined the work before V, who is not the last person to join work. Two person joined the work between P and R. V joined the work after R, who joined the work before March. U joined the work immediately before P who does not joined in May.

11) Who joined the work on July?

a) Q

b) S

c) V

d) T

e) R

Ans-4

12) How many persons joined the work before Q?

a) Three

b) Two

c) Four

d) One

e) Five

Ans-3

13) What is the position of U with respect to R?

a) Joined before R

b) Joined after two months

c) Joined immediate month

d) Joined after three months

e) None of these

Ans-2

14) Four of them following are in the same group, which is not belongs to that group?

a) R- U

b) P-V

c) Q-T

d) S-P

e) U-V

Ans-5

15) Who joined the work after Q?

a) R

b) P

c) V

d) U

e) S

Ans-3

Solution (11-15):

Final arrangement as follows,

Month	Person
January	R
February	S
March	U
April	P
May	Q
June	V
July	T

Direction (16-20): Answer the questions based on the information given below.

Six persons namely Aman, Ajay, Amit, Alok, Ashish and Ashwani are getting different salaries but not necessarily in the same order.

Ashwani gets more than Ashish and not less than Alok. Aman gets more than Ashish and who gets salary of 5000 more than Ashish. Amit gets more than Alok, who gets salary not more than anyone. Highest salary person gets salary of 50000. Aman gets less than Ashwani, who is not the highest salaried person. Ashish gets more than Ajay and who gets salary of 15000.

16) What is the sum of the salary of Amit and Aman?

a) 40000

b) 50000

c) 70000

d) 60000

e) 80000

Ans-3

17) Who gets second lowest salary?

a) Amit

b) Ashish

c) Aman

d) Ajay

e) Ashwani

Ans-4

18) How many person gets salary more than Ashish?

a) Four

b) Two

c) Three

d) One

e) None

Ans-3

19) What is the possible salary of Ashwani?

a) 14000

b) 16000

c) 19000

d) 21000

e) 17000

Ans-4

20) Which of the following pair may be true?

- a) Ajay-25000
- b) Aman-14000
- c) Amit-30000
- d) Alok-10000
- e) Ashwani-18000

Ans-4

Solution (16-20):

Final arrangement as follows,

→ Aman = Ashish + 5000 → 15000 + 5000

Hence, salary of Aman = 20000

Amit (50000) > Ashwani > Aman (20000) > Ashish (15000) > Ajay > Alok
