Quants Reasoning & English

Quantitative Aptitude

Q131

Direction: Read the data carefully and answer the following questions The following line graph shows the number of products (Glass and Bowls) manufactured by five different companies and Table given below shows the percentage of products sold in the month of April. In Company B, 70% of the sold products are Glass and the rest are Bowls. In Company C, 50% of the sold products are Glass and the rest are Bowls. What is the ratio of the number of unsold Glasses of Company B to that of Company C?

Direction:

Read the data carefully and answer the following questions

The following line graph shows the number of products (Glass and Bowls) manufactured by five different companies and Table given below shows the percentage of products sold in the month of April.

Companies	Percentage of products sold out of total products
A	60%
B	45%
C	40%
D	65%
E	35%

Visual data for Questions 101-105

Options

- A. 55:68
- B. 49:75

- C. 77:78
 D. 47:65
 E. None of these

Correct Answer: 49:75

Explanation: ATQ, Total manufactured per company A = 3750, B = 3200, C = 3250, D = 2600, E = 3200 Percentage of total products sold (given in table) A = 60%, B = 45%, C = 40%, D = 65%, E = 35% Hence total units sold & unsold (all products together) A: sold = $0.60 \times 3750 = 2250$, unsold = 1500 B: sold = $0.45 \times 3200 = 1440$, unsold = 1760 C: sold = $0.40 \times 3250 = 1300$, unsold = 1950 D: sold = $0.65 \times 2600 = 1690$, unsold = 910 E: sold = $0.35 \times 3200 = 1120$, unsold = 2080 ATQ, Company B: Total sold = 1440 Glass sold = 70% of 1440 = 1008 Unsold Glass (B) = 1400 ? 1008 = 392 Company C: Total sold = 1300 Glass sold = 50% of 1300 = 650 Unsold Glass (C) = 1250 ? 650 = 600 Required ratio B:C = 392:600 = 49:75

Q132

Direction: Read the data carefully and answer the following questions The following line graph shows the number of products (Glass and Bowls) manufactured by five different companies and Table given below shows the percentage of products sold in the month of April. In Company A, 40% of the sold products are Bowls. In Company E, the ratio of sold Glasses to sold Bowls is 3:2. How many Bowls are sold by Companies A and E together?

Options

- A. 1152
 B. 1457
 C. 1348
 D. 1620
 E. None of these

Correct Answer: 1348

Explanation: ATQ, Total manufactured per company A = 3750, B = 3200, C = 3250, D = 2600, E = 3200 Percentage of total products sold (given in table) A = 60%, B = 45%, C = 40%, D = 65%, E = 35% Hence total units sold & unsold (all products together) A: sold = $0.60 \times 3750 = 2250$, unsold = 1500 B: sold = $0.45 \times 3200 = 1440$, unsold = 1760 C: sold = $0.40 \times 3250 = 1300$, unsold = 1950 D: sold = $0.65 \times 2600 = 1690$, unsold = 910 E: sold = $0.35 \times 3200 = 1120$, unsold = 2080 ATQ, Company A: Total sold = 2250 Bowls sold = 40% of 2250 = 900 Company E: Total sold = 1120 Let Glass: Bowls = 3:2 ? total 5 parts Bowls sold = $(2/5) \times 1120 = 448$ Total Bowls sold by A and E = 900 + 448 = 1348

Q133

Direction: Read the data carefully and answer the following questions The following line graph shows the number of products (Glass and Bowls) manufactured by five different companies and Table given below shows the percentage of products sold in the month of April. Each Glass has a printed selling price of Rs.100 and each Bowl has a printed selling price of Rs.80. Company C gives a 10% discount on Glasses and a 20% discount on Bowls but sells only the 40% of products indicated in the table. Among the sold products of C, the numbers of Glasses and Bowls are in the ratio 3:2. What is the total revenue (in rupees) of Company C from the sale of Glasses and Bowls in April?

Options

- A. 1,03,480
 B. 2,03,480

- C. 1,03,400
 D. 1,05,480
 E. None of these

Correct Answer: 1,03,480

Explanation: ATQ, Total manufactured per company A = 3750, B = 3200, C = 3250, D = 2600, E = 3200 Percentage of total products sold (given in table) A = 60%, B = 45%, C = 40%, D = 65%, E = 35% Hence total units sold & unsold (all products together) A: sold = $0.60 \times 3750 = 2250$, unsold = 1500 B: sold = $0.45 \times 3200 = 1440$, unsold = 1760 C: sold = $0.40 \times 3250 = 1300$, unsold = 1950 D: sold = $0.65 \times 2600 = 1690$, unsold = 910 E: sold = $0.35 \times 3200 = 1120$, unsold = 2080 ATQ, Total products sold by C = 1300 Given Glass:Bowls among sold = 3 : 2 Glass sold = $(3/5) \times 1300 = 780$ Bowls sold = $(2/5) \times 1300 = 520$ (Checks with manufacturing: 780 ? 1250 and 520 ? 2000 - valid) Effective selling prices after discount: Glass: $100 \times 0.90 = \text{Rs.}90$ Bowl: $80 \times 0.80 = \text{Rs.}64$ Revenue from Glasses = $780 \times 90 = 70,200$ Revenue from Bowls = $520 \times 64 = 33,280$ Total revenue of C = $70,200 + 33,280 = 1,03,480$

Q134

Direction: Read the data carefully and answer the following questions The following line graph shows the number of products (Glass and Bowls) manufactured by five different companies and Table given below shows the percentage of products sold in the month of April. How many products (Glasses + Bowls) of Company C were sold in April?

Options

- A. 1250
 B. 1300
 C. 1200
 D. 1800
 E. None of these

Correct Answer: 1300

Explanation: ATQ, Total manufactured per company A = 3750, B = 3200, C = 3250, D = 2600, E = 3200 Percentage of total products sold (given in table) A = 60%, B = 45%, C = 40%, D = 65%, E = 35% Hence total units sold & unsold (all products together) A: sold = $0.60 \times 3750 = 2250$, unsold = 1500 B: sold = $0.45 \times 3200 = 1440$, unsold = 1760 C: sold = $0.40 \times 3250 = 1300$, unsold = 1950 D: sold = $0.65 \times 2600 = 1690$, unsold = 910 E: sold = $0.35 \times 3200 = 1120$, unsold = 2080 ATQ, Total products manufactured by C = 3250 Percentage sold = 40% Number sold = 40% of 3250 = $0.40 \times 3250 = 1300$

Q135

Direction: Read the data carefully and answer the following questions The following line graph shows the number of products (Glass and Bowls) manufactured by five different companies and Table given below shows the percentage of products sold in the month of April. Which company sold the maximum number of products, and the number of products sold by this company is how many more than the number of products sold by the company with the minimum sales?

Options

- A. A, 1130
 B. B, 1200
 C. C, 1250
 D. D, 1000
 E. None of these

Correct Answer: A, 1130

Explanation: ATQ, Total manufactured per company A = 3750, B = 3200, C = 3250, D = 2600, E = 3200 Percentage of total products sold (given in table) A = 60%, B = 45%, C = 40%, D = 65%, E = 35% Hence total units sold & unsold (all products together) A: sold = $0.60 \times 3750 = 2250$, unsold = 1500 B: sold = $0.45 \times 3200 = 1440$, unsold = 1760 C: sold = $0.40 \times 3250 = 1300$, unsold = 1950 D: sold = $0.65 \times 2600 = 1690$, unsold = 910 E: sold = $0.35 \times 3200 = 1120$, unsold = 2080 ATQ, Maximum sold = 2250 (Company A) Minimum sold = 1120 (Company E) Difference = $2250 - 1120 = 1130$ So, A sold the maximum and it sold 1130 more products than the minimum ? selling company.

Q136

A can complete a piece of work in 21 days. A starts the work alone. After 9 days, B joins A, and together they complete the remaining work in 5 days. Find the ratio of their efficiencies.

Options

- A. 2:5
- B. 5:7
- C. 4:3
- D. 7:2
- E. None of these

Correct Answer: 5:7

Explanation: ATQ, A rate = $1/21$ A work in 9 days = $9/21 = 3/7$ Remaining work = $1 - 3/7 = 4/7$ (A + B) rate = $(4/7) / 5 = 4/35$ B rate = $4/35 - 1/21 = 1/15$ Efficiency ratio (A : B) = $(1/21) : (1/15) = 15 : 21 = 5 : 7$

Q137

P, Q and R enter into a partnership by investing Rs.5000, Rs.8000 and Rs.5600 respectively. After 4 months, P invested Rs.1400 more and Q withdraw the whole amount. And after another 5 months, R withdraws Rs.1200 and at the same time Q enters into a partnership by investing Rs.15,000. Find the difference between the shares of P and R, if the total profit at the end of the year is Rs.95310?

Options

- A. Rs.3420
- B. Rs.3360
- C. Rs.2854
- D. Rs.6230
- E. None of these

Correct Answer: Rs.3420

Explanation: ATQ, The shares of P, Q and R = $[5000 \times 4 + 6400 \times 8] : [8000 \times 4 + 15000 \times 3] : [5600 \times 9 + 4400 \times 3]$ = 71200 : 77000 : 63600 = 356 : 385 : 318 The difference between the shares of P and R = $(356 - 318) \times 95310 / 1059$ = Rs.3420

Q138

A boat has a speed of 12 km/h in still water and the speed of the stream is 3 km/h. It first covers 45 km in downstream and then travels upstream a distance which is x% less than the downstream distance. If the whole journey takes 5 hours, then find the value of 'x'.

ixamBee Offers Best Online Course for NABARD & many more exams, click here to Enroll in Online Course:

<https://www.ixambee.com/online-course/nabard-grade-a> or contact us at 9205524028

Options

- A. 20
- B. 60
- C. 85
- D. 30
- E. None of these

Correct Answer: 60

Explanation: ATQ, Distance covered by boat in upstream = $\left[\frac{1}{2} \left(\frac{x}{100} \right) \times 45 \right]$ km Upstream speed of the boat = $12 - 3 = 9$ km/h Downstream speed of the boat = $12 + 3 = 15$ km/h According to the question; $\left[\frac{1}{2} \left(\frac{x}{100} \right) \times 45 \right] \div 9 + (45 \div 15) = 5$ Or, $\left\{ \frac{1}{2} \left(\frac{x}{100} \right) \times (45/9) \right\} = 5 - 3$ Or, $\left\{ \frac{1}{2} \left(\frac{x}{100} \right) \times 5 \right\} = 2$ Or, $\frac{1}{2} \left(\frac{x}{100} \right) = \frac{2}{5}$ Or, $(x/100) = \frac{1}{2} \times \frac{2}{5} = \frac{3}{5}$ Or, $x = 60$

Q139

The present age ratio of A to B is 8:5. Five years ago, the ratio of their ages was 7:4. If C is 10 years older than B, then find the present age of C.

Options

- A. 35 yrs
- B. 28 yrs
- C. 42 yrs
- D. 54 yrs
- E. None of these

Correct Answer: 35 yrs

Explanation: ATQ, Let, the present age of A and B be $8x$ years and $5x$ years. $(8x - 5)/(5x - 5) = 7/4$ $4(8x - 5) = 7(5x - 5)$ $32x - 20 = 35x - 35$ $35x - 32x = 35 - 20$ $3x = 15$ $x = 5$ The present age of A = $8 \times 5 = 40$ years The present age of B = $5 \times 5 = 25$ years C is 10 years older than B The present age of C = $25 + 10 = 35$ years

Q140

In a mixture, the milk and honey are in the ratio 9:2. When 44 liters of the mixture is replaced with 20 liters of honey, the ratio becomes 9:4. Find the initial amount of honey.

Options

- A. 35 liters
- B. 24 liters
- C. 42 liters
- D. 54 liters
- E. None of these

Correct Answer: 24 liters

Explanation: ATQ, Let milk = $9x$ and honey = $2x$ After removing 44 liters, Milk left = $9x - 44 \times (9/11) = 9x - 36$ Honey left = $2x - 44 \times (2/11) = 2x - 8$ After adding 20 liters of honey, $(9x - 36) / (2x - 8 + 20) = 9/4$ $36x - 144 = 18x + 72$ $18x = 216$ $x = 12$ Initial quantity of honey = $2x = 24$ liters

Q141

The cost price of Shirt is Rs. 700 more than the cost price of T-shirt. Shirt is sold at a profit of 20%, and T-shirt is sold at a profit of 35%. If both shirts have the same selling price, find the cost price of shirt.

Options

- A. Rs.4200
- B. Rs.6300
- C. Rs.6370
- D. Rs.4300
- E. None of these

Correct Answer: Rs.6300

Explanation: ATQ, $(x+700) \frac{120}{100} = x \frac{135}{100}$ $24x + 16800 = 27x$ $3x = 16800$ $x = 5600$ Cost price of shirt = $5600 + 700 = \text{Rs.}6300$ Required answer = Rs.6300

Q142

A sum of money earns Rs.500 as Simple Interest (SI) in 2 years at $r\%$ per annum. If the Compound Interest (CI) compounded annually for 2 years is Rs.25 more than the SI, find the Amount after 2 years at CI

Options

- A. Rs.2200
- B. Rs.2300
- C. Rs.3025
- D. Rs.7300
- E. None of these

Correct Answer: Rs.3025

Explanation: Given: SI (2 years) = 500 CI ? SI (2 years) = 25 Formulas: SI for 2 years = $(P * r * 2) / 100$ For 2 years (compounded annually): CI ? SI = $P * (r/100)^2$ Use SI equation $(P * r * 2) / 100 = 500$ $P * r = 500 * 100 / 2 = 25000$... (1) Use (CI ? SI) equation $P * (r/100)^2 = 25$ $P * r^2 / 10000 = 25$ $P * r^2 = 25 * 10000 = 250000$... (2) Step 3: Divide (2) by (1) $(P * r^2) / (P * r) = 250000 / 25000$ $r = 10$ Find P from (1) $P * 10 = 25000$ $P = 2500$ Amount after 2 years at CI $A = P * (1 + r/100)^2$ $A = 2500 * (1.10)^2 = 2500 * 1.21 = 3025$ Amount after 2 years (CI) = Rs.3025

Q143

Akshat and Saksham are assigned two work-sites at 28 km and 35 km from their house. They left together and reached exactly at 10:00 A.M. One day, the sites were swapped and Akshat started 9 minutes earlier than Saksham to reach on time. Find the speed of Akshat.

Options

- A. 84 km/hr
- B. 68 km/hr
- C. 77 km/hr
- D. 49 km/hr
- E. None of these

Correct Answer: 84 km/hr

ixamBee Offers Best Online Course for NABARD & many more exams, click here to Enroll in Online Course:

<https://www.ixambee.com/online-course/nabard-grade-a> or contact us at 9205524028

Explanation: ATQ, Distance covered by Akshat and Saksham = 28 km and 35 km, respectively Since, both of them reached their respective places at same time Therefore, ratio of speeds of Akshat and Saksham = $28:35 = 4:5$ Let the speeds of Akshat and Saksham be $4x$ km/hr and $5x$ km/hr, respectively Time taken by Akshat on the day of interchange = $35/(4x)$ hours Time taken by Saksham on the day of interchange = $28/(5x)$ hours According to the question, $(35/(4x)) - (28/(5x)) = 9/60$ Or, $(35/4 - 28/5)/x = 3/20$ Or, $((175 - 112)/20)/x = 3/20$ Or, $(63/20)/x = 3/20$ Or, $63/(20x) = 3/20$ Or, $63/x = 3$ Or, $x = 21$ Therefore, speed of Akshat = $4x = 84$ km/hr

Q144

Rohit used to earn Rs. 42,000 per month. His spending to saving ratio was 5:9. After a salary increment, he reduced his expenses by 20% and his savings increased by 20%. What was the hike in his salary?

Options

- A. Rs.2400
- B. Rs.5600
- C. Rs.9500
- D. Rs.3500
- E. None of these

Correct Answer: Rs.2400

Explanation: ATQ, Initially, expenditure of Rohit = $42000 \times (5/14) = \text{Rs. } 15,000$ Initially, savings of Rohit = $42000 \times (9/14) = \text{Rs. } 27,000$ After salary hike, expenditure = $15000 \times (80/100) = \text{Rs. } 12,000$ After salary hike, savings = $27000 \times (120/100) = \text{Rs. } 32,400$ So, increased salary = $12000 + 32400 = \text{Rs. } 44,400$ Required salary hike = $44400 - 42000 = \text{Rs. } 2,400$

Q145

Find the missing number in the given number series. 98, 89, 114, 50, 194, ?

Options

- A. -95
- B. 59
- C. -77
- D. 33

Correct Answer: -95

Explanation: ATQ, $98 ? 89 : 98 ? 3^2 = 98 ? 9 = 89$ $89 ? 114 : 89 + 5^2 = 89 + 25 = 114$ $114 ? 50 : 114 ? 8^2 = 114 ? 64 = 50$ $50 ? 194 : 50 + 12^2 = 50 + 144 = 194$ Squares used: $3^2, 5^2, 8^2, 12^2$ Bases: 3, 5, 8, 12 (increase by +2, +3, +4) Next increase = +5 ? next base = 17 So next term = $194 ? 17^2 = 194 ? 289 = -95$

Q146

Direction: Find the wrong one in the series: 907, 1026, 1155, 1302, 1467, 1652

Options

- A. 1026
- B. 1302
- C. 1652

ixamBee Offers Best Online Course for NABARD & many more exams, click here to Enroll in Online Course:

<https://www.ixambee.com/online-course/nabard-grade-a> or contact us at 9205524028

- D. 1467
E. 1155

Correct Answer: 1026

Explanation: The pattern is: difference of difference +117, +131, +147, +165, +185 +14 +16 +18 +20 Hence 1026 should be replaced by 1024.

Q147

Direction: What will come in place of question mark (?) in the following number series? 1326, 1713, 2172, 2709, 3330, ?

Options

- A. 4070
B. 4015
C. 4078
D. 4041
E. 4084

Correct Answer: 4041

Explanation: $113 - 5 = 1326$ $123 - 15 = 1713$ $133 - 25 = 2172$ $143 - 35 = 2709$ $153 - 45 = 3330$ $163 - 55 = 4041$

Q148

In the question, two equations I and II are given. You have to solve both the equations to establish the correct relation between x and y. I. $3x^2 - 13x + 14 = 0$ II. $3y^2 - 17y + 24 = 0$

Options

- A. $x > y$
B. $x < y$
C. $x = y$ or the relationship cannot be established
D. $x ? y$
E. $x ? y$

Correct Answer: $x < y$

Explanation: ATQ, On solving for x and y we get $x = 2, 2.33$ $y = 3, 2.66$ x

Q149

In the question, two equations I and II are given. You have to solve both the equations to establish the correct relation between x and y. I. $x^2 - 7x - 60 = 0$ II. $y^2 + 14y + 48 = 0$

Options

- A. $x > y$
B. $x < y$
C. $x = y$ or the relationship cannot be established
D. $x ? y$
E. $x ? y$

Correct Answer: $x > y$

Explanation: ATQ, On solving for x and y we get $x = 12$, $-5y = -6$, -8 ($12 > \text{both } y$; $-5 > \text{both } y$) $x > y$

Q150

In the question, two equations I and II are given. You have to solve both the equations to establish the correct relation between x and y. I. $x^2 - 19x + 84 = 0$ II. $y^2 - 25y + 156 = 0$

Options

- A. $x > y$
- B. $x < y$
- C. $x = y$ or the relationship cannot be established
- D. $x ? y$
- E. $x ? y$

Correct Answer: $x ? y$

Explanation: ATQ, On solving for x and y we get $x = 12, 7$ $y = 13, 12$ ($12 ? 13$, $12 = 12$, $7 x ? y$)

Reasoning Ability

Q151

Direction: Answer the questions based on the information given below. Eight persons N, O, H, I, P, K, L, and M sit in two parallel rows (Row 1 and Row 2) such that four persons sit in Row 1 and face south direction and four persons sit in Row 2 and face north direction. Persons in both the rows face each other. Each of them is from different cities Pune, Agra, Nashik, Surat, Kochi, Madurai, Chennai and Ranchi. I sits third to the left of N. I sits adjacent to the one, who faces L. L sits second to the right of the one, who is from Chennai. P sits second to the left of the one, who is from Ranchi. P faces H, who is from Surat. P is not from Nashik. The immediate neighbour of M faces the one, who is from Nashik. K faces the one, who is from Pune. K sits in Row 2. Neither N nor P is from Madurai or Kochi. I is not from Madurai. The one, who is from _____, sits immediately right of the one, who faces L.

Options

- A. Kochi
- B. Surat
- C. No one
- D. Ranchi
- E. Agra

Correct Answer: Surat

Explanation: I sits third to the left of N. I sits adjacent to the one, who faces L. L sits second to the right of the one, who is from Chennai. P sits second to the left of the one, who is from Ranchi. P faces H, who is from Surat. P is not from Nashik. There will be two cases: In N sits at place no. 1, then I will sit at place no. 4. L will sit at place no. 7. If the one, who is from Ranchi sits at place no. 8, then P will sit at place no. 6. H will sit at place no. 2. If N sits at place no. 8, then I will sit at place no. 5. L will sit at place no. 2. If the one, who is from Ranchi sits at place no. 1, then P will sit at place no. 3. H will sit at place no. 7. The immediate neighbour of M faces the one, who is from Nashik. K faces the one, who is from Pune. K sits in Row 2. Neither N nor P is from Madurai or Kochi. I is not from Madurai. If M sits at place no. 8, then the one, who is from Nashik sits at place no. 3. If K sits at place no. 5, then the one, who is from Pune sits at place no. 1. As neither N nor P is from Madurai or Kochi. So, L is from Madurai. I is from Kochi. P is from Agra. If M sits at place no. 1, then the one, who is from Nashik sits at place no. 6. If K sits at place no. 6, then the one, who is from Pune sits at place no. 2. As neither N nor P is from Madurai or Kochi. So this case will get discarded.

Q152

Direction: Answer the questions based on the information given below. Eight persons N, O, H, I, P, K, L, and M sit in two parallel rows (Row 1 and Row 2) such that four persons sit in Row 1 and face south direction and four persons sit in Row 2 and face north direction. Persons in both the rows face each other. Each of them is from different cities Pune, Agra, Nashik, Surat, Kochi, Madurai, Chennai and Ranchi. I sits third to the left of N. I sits adjacent to the one, who faces L. L sits second to the right of the one, who is from Chennai. P sits second to the left of the one, who is from Ranchi. P faces H, who is from Surat. P is not from Nashik. The immediate neighbour of M faces the one, who is from Nashik. K faces the one, who is from Pune. K sits in Row 2. Neither N nor P is from Madurai or Kochi. I is not from Madurai. Four of the following five persons are related to one another in some way. Find the odd one out.

ixamBee Offers Best Online Course for NABARD & many more exams, click here to Enroll in Online Course:
<https://www.ixambee.com/online-course/nabard-grade-a> or contact us at 9205524028

- A. I
- B. O
- C. K
- D. N
- E. M

Correct Answer: O

Explanation: I sits third to the left on N. I sits adjacent to the one, who faces L. L sits second to the right on the one, who is from Chennai. P sits second to the left on the one, who is from Ranchi. P faces H, who is from Surat. P is not from Nashik. There will be two cases: In N sits at place no. 1, then I will sit at place no. 4. L will sit at place no. 7. If the one, who is from Ranchi sits at place no. 8, then P will sit at place no. 6. H will sit at place no. 2. If N sits at place no. 8, then I will sit at place no. 5. L will sit at place no. 2. If the one, who is from Ranchi sits at place no. 1, then P will sit at place no. 3. H will sit at place no. 7. The immediate neighbour on M faces the one, who is from Nashik. K faces the one, who is from Pune. K sits in Row 2. Neither N nor P is from Madurai or Kochi. I is not from Madurai. If M sits at place no. 8, then the one, who is from Nashik sits at place no. 3. If K sits at place no. 5, then the one, who is from Pune sits at place no. 1. As neither N nor P is from Madurai or Kochi. So, L is from Madurai. I is from Kochi. P is from Agra. If M sits at place no. 1, then the one, who is from Nashik sits at place no. 6. If K sits at place no. 6, then the one, who is from Pune sits at place no. 2. As neither N nor P is from Madurai or Kochi. So this case will get discarded.

Q153

Direction: Answer the questions based on the information given below. Eight persons N, O, H, I, P, K, L, and M sit in two parallel rows (Row 1 and Row 2) such that four persons sit in Row 1 and face south direction and four persons sit in Row 2 and face north direction. Persons in both the rows face each other. Each on them is from different cities Pune, Agra, Nashik, Surat, Kochi, Madurai, Chennai and Ranchi. I sits third to the left on N. I sits adjacent to the one, who faces L. L sits second to the right on the one, who is from Chennai. P sits second to the left on the one, who is from Ranchi. P faces H, who is from Surat. P is not from Nashik. The immediate neighbour on M faces the one, who is from Nashik. K faces the one, who is from Pune. K sits in Row 2. Neither N nor P is from Madurai or Kochi. I is not from Madurai. ____ sits adjacent to the one, who is from Agra.

Options

- A. K
- B. O
- C. H
- D. N
- E. None on the above

Correct Answer: K

Explanation: I sits third to the left on N. I sits adjacent to the one, who faces L. L sits second to the right on the one, who is from Chennai. P sits second to the left on the one, who is from Ranchi. P faces H, who is from Surat. P is not from Nashik. There will be two cases: In N sits at place no. 1, then I will sit at place no. 4. L will sit at place no. 7. If the one, who is from Ranchi sits at place no. 8, then P will sit at place no. 6. H will sit at place no. 2. If N sits at place no. 8, then I will sit at place no. 5. L will sit at place no. 2. If the one, who is from Ranchi sits at place no. 1, then P will sit at place no. 3. H will sit at place no. 7. The immediate neighbour on M faces the one, who is from Nashik. K faces the one, who is from Pune. K sits in Row 2. Neither N nor P is from Madurai or Kochi. I is not from Madurai. If M sits at place no. 8, then the one, who is from Nashik sits at place no. 3. If K sits at place no. 5, then the one, who is from Pune sits at place no. 1. As neither N nor P is from Madurai or Kochi. So, L is from Madurai. I is from Kochi. P is from Agra. If M sits at place no. 1, then the one, who is from Nashik sits at place no. 6. If K sits at place no. 6, then the one, who is from Pune sits at place no. 2. As neither N nor P is from Madurai or Kochi. So this case will get discarded.

Q154

Direction: Answer the questions based on the information given below. Eight persons N, O, H, I, P, K, L, and M sit in two parallel rows (Row 1 and Row 2) such that four persons sit in Row 1 and face south direction and four persons sit in Row 2 and face north direction. Persons in both the rows face each other. Each of them is from different cities Pune, Agra, Nashik, Surat, Kochi, Madurai, Chennai and Ranchi. I sits third to the left of N. I sits adjacent to the one, who faces L. L sits second to the right of the one, who is from Chennai. P sits second to the left of the one, who is from Ranchi. P faces H, who is from Surat. P is not from Nashik. The immediate neighbour of M faces the one, who is from Nashik. K faces the one, who is from Pune. K sits in Row 2. Neither N nor P is from Madurai or Kochi. I is not from Madurai. As many persons sit to the right of the one, who is from Nashik as to the right of the one, who is from ____.

Options

- A. Surat
- B. Madurai
- C. Agra
- D. Kochi
- E. None of the above

Correct Answer: Agra

Explanation: I sits third to the left of N. I sits adjacent to the one, who faces L. L sits second to the right of the one, who is from Chennai. P sits second to the left of the one, who is from Ranchi. P faces H, who is from Surat. P is not from Nashik. There will be two cases: In N sits at place no. 1, then I will sit at place no. 4. L will sit at place no. 7. If the one, who is from Ranchi sits at place no. 8, then P will sit at place no. 6. H will sit at place no. 2. If N sits at place no. 8, then I will sit at place no. 5. L will sit at place no. 2. If the one, who is from Ranchi sits at place no. 1, then P will sit at place no. 3. H will sit at place no. 7. The immediate neighbour of M faces the one, who is from Nashik. K faces the one, who is from Pune. K sits in Row 2. Neither N nor P is from Madurai or Kochi. I is not from Madurai. If M sits at place no. 8, then the one, who is from Nashik sits at place no. 3. If K sits at place no. 5, then the one, who is from Pune sits at place no. 1. As neither N nor P is from Madurai or Kochi. So, L is from Madurai. I is from Kochi. P is from Agra. If M sits at place no. 1, then the one, who is from Nashik sits at place no. 6. If K sits at place no. 6, then the one, who is from Pune sits at place no. 2. As neither N nor P is from Madurai or Kochi. So this case will get discarded.

Q155

Direction: Answer the questions based on the information given below. Six persons D, E, F, G, H and I are ranked according to their height. The number of persons taller than I is same as the number of persons shorter than H. G is taller than E. G is shorter than I and E is taller than H. The number of persons taller than D is one more than the number of persons shorter than F. The height of the third tallest person is 180cm and the height of the shortest person is 160cm. The height of F is not 180cm. Who among the following is the tallest person?

Options

- A. D
- B. F
- C. I
- D. Either option 'B' or 'C'
- E. Cannot be determined

Correct Answer: I

Explanation: G is taller than E. G is shorter than I and E is taller than H. $I > G > E > H$ The number of persons taller than I is same as the number of persons shorter than H. The number of persons taller than D is one more than the number of persons shorter than F. $I > G > D > E > F > H$ The height of the third tallest person is 180cm and the height of the shortest person is 160cm. The height of F is not 180cm. $I > G > D(180) > E > F > H(160)$ Therefore, the final arrangement is as follows: $I > G > D(180\text{cm}) > E > F > H(160\text{cm})$

Q156

Direction: Answer the questions based on the information given below. Six persons D, E, F, G, H and I are ranked according to their height. The number of persons taller than I is same as the number of persons shorter than H. G is taller than E. G is shorter than I and E is taller than H. The number of persons taller than D is one more than the number of persons shorter than F. The height of the third tallest person is 180cm and the height of the shortest person is 160cm. The height of F is not 180cm. Who among the following is/are shorter than D?

Options

- A. G
- B. H
- C. F
- D. E
- E. Only options 'B', 'C' and 'D'

Correct Answer: Only options 'B', 'C' and 'D'

Explanation: G is taller than E. G is shorter than I and E is taller than H. $I > G > E > H$ The number of persons taller than I is same as the number of persons shorter than H. The number of persons taller than D is one more than the number of persons shorter than F. $I > G > D > E > F > H$ The height of the third tallest person is 180cm and the height of the shortest person is 160cm. The height of F is not 180cm. $I > G > D(180) > E > F > H(160)$ Therefore, the final arrangement is as follows: $I > G > D(180\text{cm}) > E > F > H(160\text{cm})$

Q157

Direction: Answer the questions based on the information given below. Six persons D, E, F, G, H and I are ranked according to their height. The number of persons taller than I is same as the number of persons shorter than H. G is taller than E. G is shorter than I and E is taller than H. The number of persons taller than D is one more than the number of persons shorter than F. The height of the third tallest person is 180cm and the height of the shortest person is 160cm. The height of F is not 180cm. What can be the possible height of F?

Options

- A. 186cm
- B. 168cm
- C. 158cm
- D. 155cm
- E. 185cm

Correct Answer: 168cm

Explanation: G is taller than E. G is shorter than I and E is taller than H. $I > G > E > H$ The number of persons taller than I is same as the number of persons shorter than H. The number of persons taller than D is one more than the number of persons shorter than F. $I > G > D > E > F > H$ The height of the third tallest person is 180cm and the height

of the shortest person is 160cm. The height of F is not 180cm. $I > G > D(180) > E > F > H(160)$ Therefore, the final arrangement is as follows: $I > G > D(180\text{cm}) > E > F > H(160\text{cm})$

Q158

Five persons M, N, O, P and Q are sitting in a row facing north. M is sitting third to the right of N. P sits second to the left of M. Q sits at one of the end of the row. One person sits between Q and P. Who sits third to the left of O?

Options

- A. M
- B. P
- C. N
- D. Q
- E. None of these

Correct Answer: Q

Explanation: R is sitting third to the right of N. N _____ M P sits second to the left of M. N P _____ M One person sits between Q and P. Q sits at one of the end of the row. Q N P O M Final arrangement: Q N P O M

Q159

S, T, U, V and W are five friends sitting around a circular table facing away from the centre. U is sitting immediate left of W. U is not an immediate neighbor of S and T. The one, who is second to the right of W, is sitting immediate left of V. What is the position of S with respect to W?

Options

- A. Immediate right
- B. Second to the right
- C. Immediate left
- D. Either (a) or (b)
- E. None of these

Correct Answer: Either (a) or (b)

Explanation: Explanation not available in source.

Q160

Direction: Study the following information carefully and answer the questions given below: Tarun starts moving in south direction from his saloon to hospital where his mother works. After moving 10 m to reach a book store, from there he took a right turn and move 20 m to reach his post office. He moves southwards direction and after travelling 11 m, he reach a bank, from there he took a left turn and travels 40 m to reach the Hospital, but his mother was not there. So, he ask her mother's colleagues where he can meet. She tells her mother is in park which is 11 m north from the hospital. What is distance and direction between Post office with respect to Hospital?

Options

NABARD 2025 PYP – QRE

- A. ₹1721 m.; north-west
- B. ₹1684 m.; South-west
- C. ₹2100 m.; north-west
- D. ₹1448 m.; south-west
- E. None

Correct Answer: ₹1721 m.; north-west

Explanation: Distance and direction between Manav post office with respect to hospital = $\sqrt{11^2 + 40^2} = \sqrt{121 + 1600} = \sqrt{1721}$ m.

Q161

Direction: Study the following information carefully and answer the questions given below: Tarun starts moving in south direction from his saloon to hospital where his mother works. After moving 10 m to reach a book store, from there he took a right turn and move 20 m to reach his post office. He moves southwards direction and after travelling 11 m, he reach a bank, from there he took a left turn and travels 40 m to reach the Hospital, but his mother was not there. So, he ask her mother's colleagues where he can meet. She tells her mother is in park which is 11 m north from the hospital. What is the distance between Bank and Saloon?

Options

- A. 37m
- B. 15m
- C. 25m
- D. 32m
- E. 29m

Correct Answer: 29m

Explanation: Distance between Bank and Saloon = $\sqrt{21^2 + 20^2} = \sqrt{441 + 400} = \sqrt{841} = 29$ m.

Q162

Direction: Study the following information carefully and answer the questions given below: Tarun starts moving in south direction from his saloon to hospital where his mother works. After moving 10 m to reach a book store, from there he took a right turn and move 20 m to reach his post office. He moves southwards direction and after travelling 11 m, he reach a bank, from there he took a left turn and travels 40 m to reach the Hospital, but his mother was not there. So, he ask her mother's colleagues where he can meet. She tells her mother is in park which is 11 m north from the hospital. What is the direction of Park with respect to his Saloon?

Options

- A. North -west
- B. North-east
- C. South-west
- D. South-east
- E. Cannot determine

Correct Answer: South-east

Explanation: Explanation not available in source.

Q163

Direction: In the question below consists of three statements followed by five conclusions. Assume the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements. **Statements:** Only a few tablets are computers No tablet is a laptop. No camera is a computer. **Conclusions:**

Options

- A. Some cameras being laptops is a possibility.
- B. All tablets being computers is a possibility.
- C. Some tablets are cameras
- D. Some laptops are tablets
- E. Some cameras being computers is a possibility.

Correct Answer: Some cameras being laptops is a possibility.

Explanation: Some tablets are computers (I) + No computer is a camera (E) ? Some tablets are not cameras (O) ? Probable conclusion ? Some cameras may be laptops (I). Hence conclusion I follows but conclusion III does not follow. Only a few tablets are computers ? Probable conclusion ? No conclusion. Hence conclusion II does not follow. No tablet is a laptop (E) ? Conversion ? No laptop is a tablet (E). Hence conclusion IV does not follow. No camera is a computer (E) ? Probable conclusion ? No conclusion. Hence conclusion V does not follow.

Q164

Statements: Only a few boxes are puzzles. Only a few boxes are tables. Only a few variable are puzzles. **Conclusions:**

Options

- A. All variables being puzzles is a possibility.
- B. Some tables being boxes is a possibility.
- C. All puzzles being variables is a possibility
- D. All puzzles are tables
- E. Some boxes being tables is a possibility.

Correct Answer: All puzzles being variables is a possibility

Explanation: Only a few variable are puzzles ? Probable conclusion ? All puzzles being variables is a possibility (A). Hence conclusion I does not follow but conclusion III follows. Only a few boxes are tables ? Probable conclusion ? All tables being boxes is a possibility (A). Hence conclusion II does not follow. Only a few boxes are puzzles + Only a few boxes are tables ? No conclusion. Hence conclusion IV does not follow. Only a few boxes are tables ? No conclusion. Hence conclusion V does not follow.

Q165

In the question below consists of three statements followed by five conclusions. Assume the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions does not logically follow from the given

statements. Statements: I. Some colours are paints. II. Some boards are walls. III. All paints are walls.

Options

- A. Some boards being colours is a possibility.
- B. All boards being walls is a possibility.
- C. All colours are paints.
- D. All walls being paints is a possibility.
- E. Some walls are paints.

Correct Answer: All colours are paints.

Explanation: Some colours are paints (I) + All paints are walls (A) ? Some colours are walls (I) + [Some boards are walls (I)] ? Conversion ? Some walls are boards (I) ? Probable conclusion ? Some boards may be colours (I). Hence conclusion I follows. Some boards are walls (I) ? Probable conclusion ? All boards may be walls (I). Hence conclusion II follows. Some colours are paints (I) ? I.I. ? No conclusion. Hence conclusion III does not follow. All paints are walls (A) ? Probable conclusion ? All walls may be paints (I). Hence conclusion IV follows. All paints are walls (A) ? Conversion ? Some walls are paints (I). Hence conclusion V follows.

Q166

If the second letter of all the given words are taken to form a new three-letter meaningful word, then which of the following option gives more than one meaningful word? I. Emu, Bag, Fig II. Ant, Bad, Ape III. Ate, Wax, Act

Options

- A. Only I
- B. Only II & III
- C. Only II
- D. Only I & III
- E. All I, II, III

Correct Answer: Only II & III

Explanation: Emu, Bag, Fig = M, A, I ? AIM Ant, Bad, Ape = N, A, P ? NAP, PAN Ate, Wax, Act = T, A, C ? ACT, CAT

Q167

Direction: Answer the questions based on the information given below. Six boxes D, E, F, G, H and I are kept one above another in the WHO office such that the bottommost box is numbered as 1 and the box immediately above it is numbered as 2 and so on. Each box contains the HIV data of different countries i.e., Kenya, Mozambique, Nigeria, India, Russia and Brazil but not necessarily in the same order. Box D is a prime numbered box. The box, which contains the data of India, is kept two boxes below Box D. Only two boxes are kept between Box F and the box, which contains the data of India. Box I is kept two boxes above the box, which contains the data of Russia. The box, which contains the data of Nigeria, is kept immediately below I. No box is kept between I and H. Box E is kept below Box G, which contains neither the data of Nigeria nor Kenya. The box, which contains the data of Kenya, is kept just below the box, which contains the data of Brazil. Neither Box I nor Box F contains the data of Brazil. How many boxes are kept between H and the box, which contains the data of India?

Options

- A. One
- B. Four
- C. Two
- D. Three
- E. None of the above

Correct Answer: Four

Explanation: Box D is a prime numbered box. The box, which contains the data of India, is kept two boxes below D. Only two boxes are kept between Box F and the box, which contains the data of India. There will be two cases: If Box D is kept at place no. 5, then the box, which contains the data of India is kept at place no. 3. Box F is kept at place no. 6. If Box D is kept at place no. 3, then the box, which contains the data of India is kept at place no. 1. Box F is kept at place no. 4. I is kept two boxes above the box, which contains the data of Russia. The box, which contains the data of Nigeria, is kept immediately below I. No box is kept between I and H. Now there will be one subcase: If I is kept at place no. 3, then the box, which contains the data of Russia is kept at place no. 1. The box, which contains the data of Nigeria is kept at place no. 2. Box H will be kept either at place no. 4 or 2. If I is kept at place no. 6, then the box, which contains the data of Russia is kept at place no. 4. The box, which contains the data of Nigeria is kept at place no. 5. Box H will be kept at place no. 5. If I is kept at place no. 5, then the box, which contains the data of Russia is kept at place no. 3. The box, which contains the data of Nigeria is kept at place no. 4. Box H will be kept at place no. 6. Box E is kept below Box G, which contains neither the data of Nigeria nor the data of Kenya. The box, which contains the data of Kenya, is kept just below the box, which contains the data of Brazil. Neither Box I nor Box F contains the data of Brazil. Case 1 and 2 will get discarded as we cannot place E and G. Case 2.a. If Box G is kept at place no. 2, then Box E is kept at place no. 1. If the box, which contains the data of Brazil is kept at place no. 6, then the box, which contains the data of Kenya, is kept at place no. 5. The box, which contains the data of Russia, is kept at place no. 4. The box, which contains the data of Nigeria, is kept at place no. 3. Box H will be kept at place no. 6. Box F is kept at place no. 5. Box D is kept at place no. 3. Box E is kept at place no. 1. Box G is kept at place no. 2. Box I is kept at place no. 4. Box K is kept at place no. 6. Box L is kept at place no. 5.

Q168

Direction: Answer the questions based on the information given below. Six boxes D, E, F, G, H and I are kept one above another in the WHO office such that the bottommost box is numbered as 1 and the box immediately above it is numbered as 2 and so on. Each box contains the HIV data of different countries i.e., Kenya, Mozambique, Nigeria, India, Russia and Brazil but not necessarily in the same order. Box D is a prime numbered box. The box, which contains the data of India, is kept two boxes below Box D. Only two boxes are kept between Box F and the box, which contains the data of India. Box I is kept two boxes above the box, which contains the data of Russia. The box, which contains the data of Nigeria, is kept immediately below I. No box is kept between I and H. Box E is kept below Box G, which contains neither the data of Nigeria nor Kenya. The box, which contains the data of Kenya, is kept just below the box, which contains the data of Brazil. Neither Box I nor Box F contains the data of Brazil. ____ is kept one box below the box, which contains ____.

Options

- A. G, the data of Nigeria
- B. D, the data of Mozambique
- C. D, the data of Brazil
- D. G, the data of Russia
- E. None of the above

Correct Answer: G, the data of Russia

Explanation: Box D is a prime numbered box. The box, which contains the data of India, is kept two boxes below D. Only two boxes are kept between Box F and the box, which contains the data of India. There will be two cases: If Box D is kept at place no. 5, then the box, which contains the data of India is kept at place no. 3. Box F is kept at place no. 6. If Box D is kept at place no. 3, then the box, which contains the data of India is kept at place no. 1. Box F is kept at place no. 4. I is kept two boxes above the box, which contains the data of Russia. The box, which contains the data of Nigeria, is kept immediately below I. No box is kept between I and H. Box E is kept below Box G, which contains neither the data of Nigeria nor Kenya. The box, which contains the data of Kenya, is kept just below the box, which contains the data of Brazil. Neither Box I nor Box F contains the data of Brazil. Case 1 and 2 will get discarded as we cannot place E and G. Case 2.a. If Box G is kept at place no. 2, then Box E is kept at place no. 1. If the box, which contains the data of Brazil is kept at place no. 6, then the box, which contains the data of Kenya, is kept at place no. 5. The box, which contains the data of Russia, is kept at place no. 4. The box, which contains the data of Nigeria, is kept at place no. 3. Box H will be kept at place no. 6. Box F is kept at place no. 5. Box D is kept at place no. 3. Box E is kept at place no. 1. Box G is kept at place no. 2. Box I is kept at place no. 4. Box K is kept at place no. 6. Box L is kept at place no. 5.

Q170

Direction: Answer the questions based on the information given below. Six boxes D, E, F, G, H and I are kept one above another in the WHO office such that the bottommost box is numbered as 1 and the box immediately above it is numbered as 2 and so on. Each box contains the HIV data of different countries i.e., Kenya, Mozambique, Nigeria, India, Russia and Brazil but not necessarily in the same order. Box D is a prime numbered box. The box, which contains the data of India, is kept two boxes below Box D. Only two boxes are kept between Box F and the box, which contains the data of India. Box I is kept two boxes above the box, which contains the data of Russia. The box, which contains the data of Nigeria, is kept immediately below I. No box is kept between I and H. Box E is kept below Box G, which contains neither the data of Nigeria nor Kenya. The box, which contains the data of Kenya, is kept just below the box, which contains the data of Brazil. Neither Box I nor Box F contains the data of Brazil. The number of boxes, which are kept above the box, which is immediately above D is same as the number of boxes, which are kept between D and ____.

Options

- A. E
- B. I
- C. H
- D. F
- E. None of the above

Correct Answer: H

Explanation: Box D is a prime numbered box. The box, which contains the data of India, is kept two boxes below D. Only two boxes are kept between Box F and the box, which contains the data of India. There will be two cases: If Box D is kept at place no. 5, then the box, which contains the data of India is kept at place no. 3. Box F is kept at place no. 6. If Box D is kept at place no. 3, then the box, which contains the data of India is kept at place no. 1. Box F is kept at place no. 4. I is kept two boxes above the box, which contains the data of Russia. The box, which contains the data of Nigeria, is kept immediately below I. No box is kept between I and H. Now there will be one subcase: If I is kept at place no. 3, then the box, which contains the data of Russia is kept at place no. 1. The box, which contains the data of Nigeria is kept at place no. 2. Box H will be kept either at place no. 4 or 2. If I is kept at place no. 6, then the box, which contains the data of Russia is kept at place no. 4. The box, which contains the data of Nigeria is kept at place no. 5. Box H will be kept at place no. 5. If I is kept at place no. 5, then the box, which contains the data of Russia is kept at place no. 3. The box, which contains the data of Nigeria is kept at place no. 4. Box H will be kept at place no. 6. Box E is kept below Box G, which contains neither the data of Nigeria nor the data of Kenya. The box, which contains the data of Kenya, is kept just below the box, which contains the data of Brazil. Neither Box I nor Box F contains the data of Brazil. Case 1 and 2 will get discarded as we cannot place E and G. Case 2.a. If Box G is kept at place no. 2, then Box E is kept at place no. 1. If the box, which contains the data of Brazil is kept at place no. 6, then the box which contains the data of Kenya is kept at place no. 5.

Q171

Direction: Read the following passage and answer the questions accordingly Youth are increasingly turning away from agriculture, calling into question its place in a fast-changing world. This trend raises alarms for food security and rural economies, as young people feel less inclined to pick up the plow. Let's dive into why this is happening and what might turn the tide. Farming often calls for heavy upfront investments in land, seeds, and equipment, yet returns can be shaky due to weather whims and market fluctuations. Young folks raise valid concerns about debt traps and low profits compared to urban gigs in tech or services, making them inclined toward steadier paychecks elsewhere. Without better credit access or subsidies tailored for starters, agriculture feels like a gamble not worth taking. Many see farming as back-breaking toil under the sun, not the high-tech venture it could be with drones and AI. This perception raises barriers, as youth inclined to innovation chase careers in sleek offices rather than muddy fields. Calls for rebranding agriculture as modern and exciting-think precision farming apps-could shift minds, but right now, it's stuck in a "grandpa's job" stereotype. Long hours, isolation in rural spots, and physical demands clash with the flexible, social lives millennials and Gen Z crave. They raise points about work-life balance, preferring remote-friendly roles over 24/7 farm calls during harvest. Youth feel more inclined to city lights where networking and quick promotions beckon, leaving family farms to age out. Another issue that pushes young people away from agriculture is the lack of independence and recognition they experience within the sector. Farming decisions are often controlled by older generations, leaving little room for young voices to experiment or lead. Many young people want to try new crops, adopt digital tools, or explore sustainable methods, but their ideas are frequently dismissed. When innovation is discouraged and authority is out of reach, agriculture begins to feel limiting rather than empowering. For a generation that values creativity and ownership, this environment makes farming an unattractive long-term choice. Schools rarely spotlight agriculture's opportunities, from agribusiness to sustainable ventures, so kids grow up clueless. This calls for curriculum tweaks and hands-on programs to spark interest early. Without them, bright minds stay inclined to STEM fields far removed from soil. To reverse this, governments and farmers must raise the bar with youth grants, tech training, and success stories that inspire. Imagine if agriculture called to ambitious dreamers as much as startups do-food systems worldwide would thrive. The potential is there; it's time to make farming irresistible again. What is the central theme of the passage?

Options

- A. The shift towards urban jobs due to the technological advancements in agriculture
- B. The generational gap in perceptions of farming and its future potential
- C. The growing interest of youth in urban farming and its positive implications
- D. The complex financial dynamics and risks that discourage youth from pursuing agriculture
- E. The increasing reliance on traditional farming methods despite technological opportunities

Correct Answer: The generational gap in perceptions of farming and its future potential

Explanation: The passage emphasizes that youth are moving away from farming due to outdated perceptions of the industry, seeing it as a back-breaking, low-paying job. The author suggests that this perception is shaped by the older generation's traditional view of agriculture, while young people value flexibility and technological innovation. This theme reflects a generational divide regarding the future of farming.

Q172

Direction: Read the following passage and answer the questions accordingly Youth are increasingly turning away from agriculture, calling into question its place in a fast-changing world. This trend raises alarms for food security and rural economies, as young people feel less inclined to pick up the plow. Let's dive into why this is happening and what might turn the tide. Farming often calls for heavy upfront investments in land, seeds, and equipment, yet returns can be shaky due to weather whims and market fluctuations. Young folks raise valid concerns about debt traps and low profits compared to urban gigs in tech or services, making them inclined toward steadier paychecks elsewhere. Without better credit access or subsidies tailored for starters, agriculture feels like a gamble not worth taking. Many see farming as back-breaking toil under the sun, not the high-tech venture it could be with drones and AI. This perception raises barriers, as youth inclined to innovation chase careers in sleek offices rather than muddy fields. Calls for rebranding agriculture as modern and exciting—think precision farming apps—could shift minds, but right now, it's stuck in a "grandpa's job" stereotype. Long hours, isolation in rural spots, and physical demands clash with the flexible, social lives millennials and Gen Z crave. They raise points about work-life balance, preferring remote-friendly roles over 24/7 farm calls during harvest. Youth feel more inclined to city lights where networking and quick promotions beckon, leaving family farms to age out. Another issue that pushes young people away from agriculture is the lack of independence and recognition they experience within the sector. Farming decisions are often controlled by older generations, leaving little room for young voices to experiment or lead. Many young people want to try new crops, adopt digital tools, or explore sustainable methods, but their ideas are frequently dismissed. When innovation is discouraged and authority is out of reach, agriculture begins to feel limiting rather than empowering. For a generation that values creativity and ownership, this environment makes farming an unattractive long-term choice. Schools rarely spotlight agriculture's opportunities, from agribusiness to sustainable ventures, so kids grow up clueless. This calls for curriculum tweaks and hands-on programs to spark interest early. Without them, bright minds stay inclined to STEM fields far removed from soil. To reverse this, governments and farmers must raise the bar with youth grants, tech training, and success stories that inspire. Imagine if agriculture called to ambitious dreamers as much as startups do—food systems worldwide would thrive. The potential is there; it's time to make farming irresistible again. According to the passage, what is one of the primary reasons young people avoid agriculture?

Options

- A. They are discouraged by the financial rewards that come with traditional farming methods
- B. They believe technological innovations will make farming obsolete
- C. They find farming to be too innovative and technologically advanced, preferring simpler urban careers
- D. They are concerned about the negative environmental impacts of farming compared to urban jobs
- E. They view farming as a physically demanding and isolating lifestyle that conflicts with modern social preferences

Correct Answer: They view farming as a physically demanding and isolating lifestyle that conflicts with modern social preferences

Explanation: The passage discusses how the physical demands and the isolation of rural life clash with the desires of millennials and Gen Z for social interaction, flexible work schedules, and a better work-life balance. This is presented as a major factor in their reluctance to pursue agriculture.

Direction: Read the following passage and answer the questions accordingly Youth are increasingly turning away from agriculture, calling into question its place in a fast-changing world. This trend raises alarms for food security and rural economies, as young people feel less inclined to pick up the plow. Let's dive into why this is happening and what might turn the tide. Farming often calls for heavy upfront investments in land, seeds, and equipment, yet returns can be shaky due to weather whims and market fluctuations. Young folks raise valid concerns about debt traps and low profits compared to urban gigs in tech or services, making them inclined toward steadier paychecks elsewhere. Without better credit access or subsidies tailored for starters, agriculture feels like a gamble not worth taking. Many see farming as back-breaking toil under the sun, not the high-tech venture it could be with drones and AI. This perception raises barriers, as youth inclined to innovation chase careers in sleek offices rather than muddy fields. Calls for rebranding agriculture as modern and exciting-think precision farming apps-could shift minds, but right now, it's stuck in a "grandpa's job" stereotype. ?Long hours, isolation in rural spots, and physical demands clash with the flexible, social lives millennials and Gen Z crave. They raise points about work-life balance, preferring remote-friendly roles over 24/7 farm calls during harvest. Youth feel more inclined to city lights where networking and quick promotions beckon, leaving family farms to age out. Another issue that pushes young people away from agriculture is the lack of independence and recognition they experience within the sector. Farming decisions are often controlled by older generations, leaving little room for young voices to experiment or lead. Many young people want to try new crops, adopt digital tools, or explore sustainable methods, but their ideas are frequently dismissed. When innovation is discouraged and authority is out of reach, agriculture begins to feel limiting rather than empowering. For a generation that values creativity and ownership, this environment makes farming an unattractive long-term choice. ?Schools rarely spotlight agriculture's opportunities, from agribusiness to sustainable ventures, so kids grow up clueless. This calls for curriculum tweaks and hands-on programs to spark interest early. Without them, bright minds stay inclined to STEM fields far removed from soil. To reverse this, governments and farmers must raise the bar with youth grants, tech training, and success stories that inspire. Imagine if agriculture called to ambitious dreamers as much as startups do-food systems worldwide would thrive. The potential is there; it's time to make farming irresistible again. The author mentions "grandpa's job" in reference to farming primarily to highlight:

Options

- A. The nostalgic appeal of farming and its deep roots in family traditions
- B. The generational inheritance of farming land and practices
- C. The image of farming as an appealing career for young people in rural areas
- D. The outdated and labour-intensive view of farming that discourages young people
- E. The outdated equipment and tools still used in modern farming

Correct Answer: The outdated and labour-intensive view of farming that discourages young people

Explanation: The phrase "grandpa's job" is used to represent the outdated and labour-intensive view of farming that young people see as unappealing. It suggests that farming is seen as something from the past, not a modern or high-tech profession, which contributes to its lack of appeal to younger generations.

Q174

Direction: Read the following passage and answer the questions accordingly Youth are increasingly turning away from agriculture, calling into question its place in a fast-changing world. This trend raises alarms for food security and rural economies, as young people feel less inclined to pick up

Imagine if agriculture called to ambitious dreamers as much as startups do—food systems worldwide would thrive. The potential is there; it's time to make farming irresistible again. What does the author mean by "farming begins to feel limiting rather than empowering"?

Options

- A. The financial risks of farming outweigh any potential for creative expression
- B. The physical and emotional toll of farming has made it less rewarding over time
- C. The lack of innovation and leadership opportunities within the farming sector discourages youth
- D. The increased reliance on technology has removed personal satisfaction from farming
- E. The political and regulatory challenges in agriculture create barriers for young farmers

Correct Answer: The lack of innovation and leadership opportunities within the farming sector discourages youth

Explanation: The passage highlights that young people want to try new crops, adopt digital tools, and explore sustainable methods, but their ideas are often dismissed. This lack of freedom to innovate and lead makes farming feel limiting rather than empowering for young people.

Q175

Direction: Read the following passage and answer the questions accordingly Youth are increasingly turning away from agriculture, calling into question its place in a fast-changing world. This trend raises alarms for food security and rural economies, as young people feel less inclined to pick up the plow. Let's dive into why this is happening and what might turn the tide. Farming often calls for heavy upfront investments in land, seeds, and equipment, yet returns can be shaky due to weather

whims and market fluctuations. Young folks raise valid concerns about debt traps and low profits compared to urban gigs in tech or services, making them inclined toward steadier paychecks elsewhere. Without better credit access or subsidies tailored for starters, agriculture feels like a gamble not worth taking. Many see farming as back-breaking toil under the sun, not the high-tech venture it could be with drones and AI. This perception raises barriers, as youth inclined to innovation chase careers in sleek offices rather than muddy fields. Calls for rebranding agriculture as modern and exciting—think precision farming apps—could shift minds, but right now, it's stuck in a "grandpa's job" stereotype. Long hours, isolation in rural spots, and physical demands clash with the flexible, social lives millennials and Gen Z crave. They raise points about work-life balance, preferring remote-friendly roles over 24/7 farm calls during harvest. Youth feel more inclined to city lights where networking and quick promotions beckon, leaving family farms to age out. Another issue that pushes young people away from agriculture is the lack of independence and recognition they experience within the sector. Farming decisions are often controlled by older generations, leaving little room for young voices to experiment or lead. Many young people want to try new crops, adopt digital tools, or explore sustainable methods, but their ideas are frequently dismissed. When innovation is discouraged and authority is out of reach, agriculture begins to feel limiting rather than empowering. For a generation that values creativity and ownership, this environment makes farming an unattractive long-term choice. To reverse this, governments and farmers must raise the bar with youth grants, tech training, and success stories that inspire. Imagine if agriculture called to ambitious dreamers as much as startups do—food systems worldwide would thrive. The potential is there; it's time to make farming irresistible again. How does the passage suggest that schools contribute to the decline in youth interest in farming?

Options

- A. By focusing too much on traditional farming skills without offering modern applications
- B. By glorifying urban careers over agricultural opportunities in their curricula
- C. By failing to integrate agricultural education into the STEM fields young people gravitate towards
- D. By providing hands-on farming experience but ignoring the academic side of agriculture
- E. By neglecting to promote agriculture as a viable career option in comparison to tech jobs

Correct Answer: By neglecting to promote agriculture as a viable career option in comparison to tech jobs

Explanation: The passage mentions that schools rarely spotlight agriculture's potential, from agribusiness to sustainable ventures. This lack of focus means students grow up unaware of the opportunities in farming, pushing them toward tech fields instead.

Q176

Direction: Read the following passage and answer the questions accordingly. Youth are increasingly turning away from agriculture, calling into question its place in a fast-changing world. This trend raises alarms for food security and rural economies, as young people feel less inclined to pick up the plow. Let's dive into why this is happening and what might turn the tide. Farming often calls for heavy upfront investments in land, seeds, and equipment, yet returns can be shaky due to weather whims and market fluctuations. Young folks raise valid concerns about debt traps and low profits compared to urban gigs in tech or services, making them inclined toward steadier paychecks elsewhere. Without better credit access or subsidies tailored for starters, agriculture feels like a

gamble not worth taking. Many see farming as back-breaking toil under the sun, not the high-tech venture it could be with drones and AI. This perception raises barriers, as youth inclined to innovation chase careers in sleek offices rather than muddy fields. Calls for rebranding agriculture as modern and exciting-think precision farming apps-could shift minds, but right now, it's stuck in a "grandpa's job" stereotype. Long hours, isolation in rural spots, and physical demands clash with the flexible, social lives millennials and Gen Z crave. They raise points about work-life balance, preferring remote-friendly roles over 24/7 farm calls during harvest. Which of the following is a synonym of "calls" as used in the passage?

Options

- A. Phones
- B. Demands
- C. Announces
- D. Mentions
- E. Predicts

Correct Answer: Demands

Explanation: The word "calls" here means requires or demands, not making a phone call. A. Phones: Refers to telephoning someone, irrelevant in this context. B. Demands: Correct. The sentence implies necessity or requirement. C. Announces: Means to declare publicly, not to require. D. Mentions: Means to refer to briefly. E. Predicts: Means to forecast future events.

Q177

Direction: Read the following passage and answer the questions accordingly Youth are increasingly turning away from agriculture, calling into question its place in a fast-changing world. This trend raises alarms for food security and rural economies, as young people feel less inclined to pick up the plow. Let's dive into why this is happening and what might turn the tide. Which of the following is a synonym of "inclined" as used in the passage?

Options

- A. Indifferent
- B. Hesitant
- C. Willing
- D. Constrained
- E. Ignorant

Correct Answer: Willing

Explanation: "Inclined" here refers to a tendency or readiness to do something. A. Indifferent: Showing no interest, concern, or preference; neutral. B. Hesitant: Uncertain or unsure, often due to a lack of confidence or reluctance. C. Willing: Ready, eager, or prepared to do something. D. Constrained: Restricted, limited, or forced in action or expression. E. Ignorant: Lacking knowledge, awareness, or education about something.

Q178

Which of the following is an antonym of "raises" as used in the passage?

Options

- A. Alleviates
- B. Consolidates
- C. Lifts
- D. Reduces
- E. Expands

Correct Answer: Reduces

Explanation: "Raises" means to increase. The antonym must convey a decrease. A. Alleviates: To make less severe or intense. B. Consolidates: To combine or unite into a single more effective whole. C. Lifts: To raise to a higher position. D. Reduces: To make smaller or less in amount, degree, or size. E. Expands: To increase in size, number, or importance.

Q179

Direction: Read the following passage and answer the questions accordingly Youth are increasingly turning away from agriculture, calling into question its place in a fast-changing world. This trend raises alarms for food security and rural economies, as young people feel less inclined to pick up the plow. Let's dive into why this is happening and what might turn the tide. Farming often calls for heavy upfront investments in land, seeds, and equipment, yet returns can be shaky due to weather whims and market fluctuations. Young folks raise valid concerns about debt traps and low profits compared to urban gigs in tech or services, making them inclined toward steadier paychecks elsewhere. Without better credit access or subsidies tailored for starters, agriculture feels like a gamble not worth taking. Many see farming as back-breaking toil under the sun, not the high-tech venture it could be with drones and AI. This perception raises barriers, as youth inclined to innovation chase careers in sleek offices rather than muddy fields. Calls for rebranding agriculture as modern and exciting-think precision farming apps-could shift minds, but right now, it's stuck in a "grandpa's job" stereotype. ?Long hours, isolation in rural spots, and physical demands clash with the flexible, social lives millennials and Gen Z crave. They raise points about work-life balance,

preferring remote-friendly roles over 24/7 farm calls during harvest. Youth feel more inclined to city lights where networking and quick promotions beckon, leaving family farms to age out. Another issue that pushes young people away from agriculture is the lack of independence and recognition they experience within the sector. Farming decisions are often controlled by older generations, leaving little room for young voices to experiment or lead. Many young people want to try new crops, adopt digital tools, or explore sustainable methods, but their ideas are frequently dismissed. When innovation is discouraged and authority is out of reach, agriculture begins to feel limiting rather than empowering. For a generation that values creativity and ownership, this environment makes farming an unattractive long-term choice. ?Schools rarely spotlight agriculture's opportunities, from agribusiness to sustainable ventures, so kids grow up clueless. This calls for curriculum tweaks and hands-on programs to spark interest early. Without them, bright minds stay inclined to STEM fields far removed from soil. To reverse this, governments and farmers must raise the bar with youth grants, tech training, and success stories that inspire. Imagine if agriculture called to ambitious dreamers as much as startups do-food systems worldwide would thrive. The potential is there; it's time to make farming irresistible again. Which of the following statements are not true based on the passage given? I) Youth are increasingly drawn to agricultural careers due to the financial stability they offer compared to urban jobs. II) The passage suggests that the image of farming as a low-tech, labor-intensive job is a major barrier to attracting younger generations. III) The passage mentions that farming is increasingly seen as a high-tech career with the integration of drones and AI. IV) The author argues that structural changes, such as better access to credit and technological training, are necessary to make farming appealing to youth.

Options

- A. Only III
- B. Only II
- C. Both I and III
- D. Both I and IV
- E. All of the above

Correct Answer: Both I and III

Explanation: I) False: The passage suggests that young people avoid farming due to low profits and financial instability compared to urban tech and service jobs, not because farming offers financial stability. II) True: The passage highlights the perception of farming as a back-breaking and outdated job, which discourages youth. III) False: The passage argues that farming is not seen as high-tech by youth but rather as an old-fashioned, labor-intensive job. IV) True: The author emphasizes the need for structural changes, like better credit access and technological training, to make farming more attractive to young people.

Q180

Fill in the blank with suitable word. The government's decision to cut funding for public education was criticized for its _____ impact on the future of underprivileged students.

Options

- A. Positive
- B. Disastrous
- C. Marginal
- D. Beneficial
- E. Incremental

Correct Answer: Disastrous

Explanation: Cutting funding for public education, especially for underprivileged students, would likely have a severe negative impact. The word "disastrous" fits best, as it implies a highly damaging outcome. The other options (positive, beneficial, incremental) suggest an outcome that would not align with the negative impact described in the question.

Q181

Fill in the blank with suitable word. Although the team had made great progress in their research, their final report was ultimately deemed _____ due to lack of supporting data.

Options

- A. Incomplete
- B. Flawless
- C. Comprehensive
- D. Irrelevant
- E. Exhaustive

Correct Answer: Incomplete

Explanation: The absence of supporting data means the report is unfinished or lacking in necessary details, making "incomplete" the most fitting choice. The other options (flawless, comprehensive, exhaustive) imply that the report is thorough and well-rounded, which contradicts the lack of data.

Q182

Fill in the blank with suitable word. The committee's decision-making process was _____, given the constant delays and lack of leadership.

Options

- A. Efficient
- B. Unfocused
- C. Organized
- D. Proactive
- E. Structured

Correct Answer: Unfocused

Explanation: The lack of leadership and constant delays suggest that the decision-making process lacked clear direction or structure, making "unfocused" the best choice. The other options (efficient, organized, proactive, structured) imply positive attributes that are inconsistent with the described issues.

Q183

Fill in the blank with suitable word. The idea that technology alone can solve all of society's problems is _____, as it ignores the complexity of human factors.

Options

- A. Naive
- B. Realistic
- C. Logical
- D. Practical

E. Optimistic

Correct Answer: Naive

Explanation: The belief that technology can solve all problems is considered "naive" because it oversimplifies the complex social, ethical, and human factors involved. The other options (realistic, logical, practical, optimistic) suggest a more grounded or idealistic viewpoint, which doesn't align with the oversimplification implied by "naive."

Q184

Direction: Six sentences are given in which one sentence is fixed. You need to rearrange the rest five sentences in a coherent paragraph. Find the correct sequence and mark that as your answer. A. The disclosures capture where the industry stands today. B. The global consulting major said its advanced AI bookings had nearly doubled year-on-year to \$2.2 billion and AI revenues had climbed to \$1.1 billion, up 120%. C. AI is becoming indistinguishable from technology itself for IT firms D. That reality was underscored a day later when Accenture reported its quarterly results. E. Yet it also announced it would stop reporting AI as a separate line item, arguing that AI is now embedded across most projects-from data modernisation to core operations-making segregation increasingly meaningless. F. AI is no longer a discrete technology layer or a fashionable add-on; it is rapidly becoming synonymous with enterprise technology itself. Which of the following sentence is the FIRST sentence after the rearrangement?

Options

- A. B
- B. C
- C. D
- D. A
- E. F

Correct Answer: C

Explanation: The correct sequence is indeed CFDBEA. C. "AI is becoming indistinguishable from technology itself for IT firms." This is the opening sentence, setting the stage for the discussion of AI's integration into IT firms. It introduces the idea that AI is not just a separate technology but has merged with other technologies in the industry. F. "AI is no longer a discrete technology layer or a fashionable add-on; it is rapidly becoming synonymous with enterprise technology itself." This sentence builds on the idea introduced in C. It explains in more detail how AI is no longer just a component or trendy addition-it is now at the core of enterprise technology. D. "That reality was underscored a day later when Accenture reported its quarterly results." This sentence follows naturally as it references real-world evidence that supports the claim made in C and F. Accenture's report serves as proof that the trend toward AI being integral to businesses is not just theory but a fact. B. "The global consulting major said its advanced AI bookings had nearly doubled year-on-year to \$2.2 billion and AI revenues had climbed to \$1.1 billion, up 120%." This sentence provides the specific financial data that underscores Accenture's results mentioned in D. It gives concrete numbers to demonstrate the massive growth in AI-related revenue. E. "Yet it also announced it would stop reporting AI as a separate line item, arguing that AI is now embedded across most projects-from data modernisation to core operations-making segregation increasingly meaningless." This sentence shows the shift in how AI is integrated across Accenture's operations, reinforcing that AI is no longer something that can be isolated as a separate entity. It's an important transition from thinking of AI as a standalone element to part of everything. A. "The disclosures capture where the industry stands today." The final sentence wraps up the entire argument by stating that the disclosures (including the financial details and the change in reporting practices) illustrate the current state of the industry-solidifying the claim that AI is a central part of enterprise technology.

Direction: Six sentences are given in which one sentence is fixed. You need to rearrange the rest five sentences in a coherent paragraph. Find the correct sequence and mark that as your answer. A. The disclosures capture where the industry stands today. B. The global consulting major said its advanced AI bookings had nearly doubled year-on-year to \$2.2 billion and AI revenues had climbed to \$1.1 billion, up 120%. C. AI is becoming indistinguishable from technology itself for IT firms D. That reality was underscored a day later when Accenture reported its quarterly results. E. Yet it also announced it would stop reporting AI as a separate line item, arguing that AI is now embedded across most projects-from data modernisation to core operations-making segregation increasingly meaningless. F. AI is no longer a discrete technology layer or a fashionable add-on; it is rapidly becoming synonymous with enterprise technology itself. Which of the following sentence is the LAST sentence after the rearrangement?

Options

- A. F
- B. B
- C. D
- D. C
- E. A

Correct Answer: A

Explanation: The correct sequence is indeed CFDBEA. C. "AI is becoming indistinguishable from technology itself for IT firms." This is the opening sentence, setting the stage for the discussion of AI's integration into IT firms. It introduces the idea that AI is not just a separate technology but has merged with other technologies in the industry. F. "AI is no longer a discrete technology layer or a fashionable add-on; it is rapidly becoming synonymous with enterprise technology itself." This sentence builds on the idea introduced in C. It explains in more detail how AI is no longer just a component or trendy addition-it is now at the core of enterprise technology. D. "That reality was underscored a day later when Accenture reported its quarterly results." This sentence follows naturally as it references real-world evidence that supports the claim made in C and F. Accenture's report serves as proof that the trend toward AI being integral to businesses is not just theory but a fact. B. "The global consulting major said its advanced AI bookings had nearly doubled year-on-year to \$2.2 billion and AI revenues had climbed to \$1.1 billion, up 120%." This sentence provides the specific financial data that underscores Accenture's results mentioned in D. It gives concrete numbers to demonstrate the massive growth in AI-related revenue. E. "Yet it also announced it would stop reporting AI as a separate line item, arguing that AI is now embedded across most projects-from data modernisation to core operations-making segregation increasingly meaningless." This sentence shows the shift in how AI is integrated across Accenture's operations, reinforcing that AI is no longer something that can be isolated as a separate entity. It's an important transition from thinking of AI as a standalone element to part of everything. A. "The disclosures capture where the industry stands today." The final sentence wraps up the entire argument by stating that the disclosures (including the financial details and the change in reporting practices) illustrate the current state of the industry-solidifying the claim that AI is a central part of enterprise technology.

becoming synonymous with enterprise technology itself. Which of the following sentence is the **THIRD** sentence after the rearrangement?

Options

- A. A
- B. B
- C. C
- D. D
- E. F

Correct Answer: D

Explanation: The correct sequence is indeed CFDBEA. C. "AI is becoming indistinguishable from technology itself for IT firms." This is the opening sentence, setting the stage for the discussion of AI's integration into IT firms. It introduces the idea that AI is not just a separate technology but has merged with other technologies in the industry. F. "AI is no longer a discrete technology layer or a fashionable add-on; it is rapidly becoming synonymous with enterprise technology itself." This sentence builds on the idea introduced in C. It explains in more detail how AI is no longer just a component or trendy addition-it is now at the core of enterprise technology. D. "That reality was underscored a day later when Accenture reported its quarterly results." This sentence follows naturally as it references real-world evidence that supports the claim made in C and F. Accenture's report serves as proof that the trend toward AI being integral to businesses is not just theory but a fact. B. "The global consulting major said its advanced AI bookings had nearly doubled year-on-year to \$2.2 billion and AI revenues had climbed to \$1.1 billion, up 120%." This sentence provides the specific financial data that underscores Accenture's results mentioned in D. It gives concrete numbers to demonstrate the massive growth in AI-related revenue. E. "Yet it also announced it would stop reporting AI as a separate line item, arguing that AI is now embedded across most projects-from data modernisation to core operations-making segregation increasingly meaningless." This sentence shows the shift in how AI is integrated across Accenture's operations, reinforcing that AI is no longer something that can be isolated as a separate entity. It's an important transition from thinking of AI as a standalone element to part of everything. A. "The disclosures capture where the industry stands today." The final sentence wraps up the entire argument by stating that the disclosures (including the financial details and the change in reporting practices) illustrate the current state of the industry-solidifying the claim that AI is a central part of enterprise technology.

Q187

Direction: Six sentences are given in which one sentence is fixed. You need to rearrange the rest five sentences in a coherent paragraph. Find the correct sequence and mark that as your answer. **A.** The disclosures capture where the industry stands today. **B.** The global consulting major said its advanced AI bookings had nearly doubled year-on-year to \$2.2 billion and AI revenues had climbed to \$1.1 billion, up 120%. **C.** AI is becoming indistinguishable from technology itself for IT firms **D.** That reality was underscored a day later when Accenture reported its quarterly results. **E.** Yet it also announced it would stop reporting AI as a separate line item, arguing that AI is now embedded across most projects-from data modernisation to core operations-making segregation increasingly meaningless. **F.** AI is no longer a discrete technology layer or a fashionable add-on; it is rapidly becoming synonymous with enterprise technology itself. Which of the following sentence is the **SECOND** sentence after the rearrangement?

Options

- A. B
- B. C
- C. D
- D. A
- E. F

Correct Answer: F

Explanation: The correct sequence is indeed CFDBEA. C. "AI is becoming indistinguishable from technology itself for IT firms." This is the opening sentence, setting the stage for the discussion of AI's integration into IT firms. It introduces the idea that AI is not just a separate technology but has merged with other technologies in the industry. F. "AI is no longer a discrete technology layer or a fashionable add-on; it is rapidly becoming synonymous with enterprise technology itself." This sentence builds on the idea introduced in C. It explains in more detail how AI is no longer just a component or trendy addition—it is now at the core of enterprise technology. D. "That reality was underscored a day later when Accenture reported its quarterly results." This sentence follows naturally as it references real-world evidence that supports the claim made in C and F. Accenture's report serves as proof that the trend toward AI being integral to businesses is not just theory but a fact. B. "The global consulting major said its advanced AI bookings had nearly doubled year-on-year to \$2.2 billion and AI revenues had climbed to \$1.1 billion, up 120%." This sentence provides the specific financial data that underscores Accenture's results mentioned in D. It gives concrete numbers to demonstrate the massive growth in AI-related revenue. E. "Yet it also announced it would stop reporting AI as a separate line item, arguing that AI is now embedded across most projects—from data modernisation to core operations—making segregation increasingly meaningless." This sentence shows the shift in how AI is integrated across Accenture's operations, reinforcing that AI is no longer something that can be isolated as a separate entity. It's an important transition from thinking of AI as a standalone element to part of everything. A. "The disclosures capture where the industry stands today." The final sentence wraps up the entire argument by stating that the disclosures (including the financial details and the change in reporting practices) illustrate the current state of the industry—solidifying the claim that AI is a central part of enterprise technology.

Q188

Direction: Six sentences are given in which one sentence is fixed. You need to rearrange the rest five sentences in a coherent paragraph. Find the correct sequence and mark that as your answer. A. The disclosures capture where the industry stands today. B. The global consulting major said its advanced AI bookings had nearly doubled year-on-year to \$2.2 billion and AI revenues had climbed to \$1.1 billion, up 120%. C. AI is becoming indistinguishable from technology itself for IT firms D. That reality was underscored a day later when Accenture reported its quarterly results. E. Yet it also announced it would stop reporting AI as a separate line item, arguing that AI is now embedded across most projects—from data modernisation to core operations—making segregation increasingly meaningless. F. AI is no longer a discrete technology layer or a fashionable add-on; it is rapidly becoming synonymous with enterprise technology itself. Which of the following sentence is the **FOURTH** sentence after the rearrangement?

Options

- A. B
- B. C
- C. D
- D. A
- E. F

Correct Answer: B

Explanation: The correct sequence is indeed CFDBEA. C. "AI is becoming indistinguishable from technology itself for IT firms." This is the opening sentence, setting the stage for the discussion of AI's integration into IT firms. It introduces the idea that AI is not just a separate technology but has merged with other technologies in the industry. F. "AI is no longer a discrete technology layer or a fashionable add-on; it is rapidly becoming synonymous with enterprise technology itself." This sentence builds on the idea introduced in C. It explains in more detail how AI is no longer just a component or trendy addition—it is now at the core of enterprise technology. D. "That reality was underscored a day later when Accenture reported its quarterly results." This sentence follows naturally as it references real-world evidence that supports the claim made in C and F. Accenture's report serves as proof that the trend toward AI being integral to businesses is not just theory but a fact. B. "The global consulting major said its advanced AI bookings had nearly doubled year-on-year to \$2.2 billion and AI revenues had climbed to \$1.1 billion, up 120%." This sentence provides the specific financial data that underscores Accenture's results mentioned in D. It gives concrete numbers to demonstrate the massive growth in AI-related revenue. E. "Yet it also announced it would stop reporting AI as a separate line item, arguing that AI is now embedded across most projects—from data modernisation to core operations—making segregation increasingly meaningless." This sentence shows the shift in how AI is integrated across Accenture's operations, reinforcing that AI is no longer something that can be isolated as a separate entity. It's an important transition from thinking of AI as a standalone element to part of everything. A. "The disclosures capture where the industry stands today." The final sentence wraps up the entire argument by stating that the disclosures (including the financial details and the change in reporting practices) illustrate the current state of the industry—solidifying the claim that AI is a central part of enterprise technology.

Q189

In each of the questions given below, read each sentence to find out whether there is any grammatical error in it. The error, if any, will be in one part of the sentence. Mark the part with the error as your answer. If there is no error, mark 'No error' as your answer (Ignore the errors of punctuation, if any). A. With top-tier private banks largely unwilling to dilute equity B. foreign investors are turning in smaller private C. sector banks, non-banking financial D. companies (NBFCs), and niche financial firms. E. No Error

Options

- A. A
- B. B
- C. C
- D. D
- E. E

Correct Answer: B

Explanation: The error is in part B. The phrase "turning in smaller private" is incorrect. The correct phrase should be "turning to smaller private," as the verb "turning to" is used when referring to a shift of attention or interest towards something.

Q190

In each of the questions given below, read each sentence to find out whether there is any grammatical error in it. The error, if any, will be in one part of the sentence. Mark the part with the error as your answer. If there is no error, mark 'No error' as your answer (Ignore the errors of punctuation, if any). A. US President Donald Trump's disruptive B. tariffs on China-despite a fragile trade C. truce-has only worsened matters by redirecting D. the exports to Europe and other markets E. No Error

Options

- A. A
- B. B
- C. C
- D. D
- E. E

Correct Answer: C

Explanation: The error is actually in Part C. The verb "have" should be used instead of "has" because the subject "tariffs" is plural, so it requires the plural form of the verb.

Q191

In each of the questions given below, read each sentence to find out whether there is any grammatical error in it. The error, if any, will be in one part of the sentence. Mark the part with the error as your answer. If there is no error, mark 'No error' as your answer (Ignore the errors of punctuation, if any). A. True digital maturity isn't about how much B. tools you deploy; it's about how teams think, C. collaborate, and solve problems with D. technology as a natural part of their work. E. No Error

Options

- A. A
- B. B
- C. C
- D. D
- E. E

Correct Answer: A

Explanation: "True digital maturity isn't about how much tools you deploy..." This should be "how many" because "tools" is countable.

Q192

In each of the questions given below, read each sentence to find out whether there is any grammatical error in it. The error, if any, will be in one part of the sentence. Mark the part with the error as your answer. If there is no error, mark 'No error' as your answer (Ignore the errors of punctuation, if any). A. Success will not belong solely to the most technologically B. advanced nations, but to those that combines engineering C. excellence with cultures built on curiosity, D. agility, and cross-disciplinary collaboration. E. No Error

Options

- A. A
- B. B
- C. C
- D. D
- E. E

Correct Answer: B

Explanation: The error is in Part B. The verb "combines" is incorrect here because it should agree with the plural subject "those". The correct verb form is "combine".

Q193

Given below is a word followed by three sentences. You need to understand whether the sentences used the highlighted word correctly or not. Mark the incorrect sentence with the incorrect word

usage as your answer. Sustain (I) The charity has been working tirelessly to sustain the educational programs for underprivileged children, ensuring they have the resources they need to thrive. (II) The excessive amount of work was beginning to sustain her energy levels, making her feel more and more drained. (III) To sustain economic growth, the government must implement policies that will support long-term development.

Options

- A. Only (I)
- B. Both (I) and (III)
- C. Only (II)
- D. Both (II) and (III)
- E. All (I), (II), and (III)

Correct Answer: Only (II)

Explanation: (I) Correct Usage: "Sustain" is correctly used here, as it refers to maintaining or keeping ongoing the educational programs. (II) Incorrect Usage: The verb "sustain" is misused here. It should indicate supporting or maintaining something, but the way it's used here creates confusion. The proper verb would be "deplete" or "exhaust" since it refers to the decreasing of her energy, not maintaining it. (III) Correct Usage: "Sustain" is correctly used here to mean maintaining or continuing the economic growth.

Q194

Given below is a word followed by three sentences. You need to understand whether the sentences used the highlighted word correctly or not. Mark the incorrect sentence with the incorrect word usage as your answer. Convey (I) The letter was able to convey the urgency of the situation, making it clear that immediate action was required. (II) The teacher tried to convey the students with appropriate assignments, but some students were given tasks that were too difficult for their level. (III) They tried to convey the colours of the curtains to the furniture, but it ended up looking mismatched.

Options

- A. Only (I)
- B. Both (I) and (II)
- C. Only (III)
- D. Both (II) and (III)
- E. All (I), (II), and (III)

Correct Answer: Both (II) and (III)

Explanation: "Convey" means to communicate, express, or make something known through words, actions, or representations. Sentence I correctly uses "convey" to mean "communicate" or "make something known" (the urgency of the situation). Sentence II uses "convey" incorrectly. It should be "assign" or "give," as "convey" refers to communicating or transferring information, not giving assignments. Sentence III uses "convey" incorrectly. It should be something like "match" or "align," as "convey" refers to transferring or communicating something, not matching colours to furniture.

Q195

Given below is a word followed by three sentences. You need to understand whether the sentences used the highlighted word correctly or not. Mark the incorrect sentence with the incorrect word

usage as your answer. Evaluate (I) The team was asked to evaluate the data from the latest experiment to determine its validity. (II) The professor asked the students to evaluate their classmates' presentations during the seminar. (III) He struggled to evaluate the concept, since it was too abstract to understand fully.

Options

- A. Only (I)
- B. Both (I) and (II)
- C. Only (III)
- D. Only (II)
- E. All (I), (II), and (III)

Correct Answer: Only (III)

Explanation: "Evaluate" means to assess or judge the quality, value, or significance of something based on a systematic process. (I) Correct Usage: Here, "evaluate" is correctly used to mean assess or judge the quality or reliability of the data. (II) Correct Usage: "Evaluate" is used correctly here to mean assess or judge the presentations. (III) Incorrect Usage: "Evaluate" is misused here because it implies judging or assessing something abstract and difficult to understand.

Q196

Given below is a word followed by three sentences. You need to understand whether the sentences used the highlighted word correctly or not. Mark the incorrect sentence with the incorrect word usage as your answer. Assist (I) The manager will assist a series of interviews to select the right candidate for the position. (II) The scientists will assist the experiment to test the hypothesis. (III) I need to assist the accuracy of the report before submitting it to my boss.

Options

- A. Only (I)
- B. Both (I) and (II)
- C. Only (III)
- D. Only (II)
- E. All (I), (II), and (III)

Correct Answer: All (I), (II), and (III)

Explanation: Sentence I uses "assist" incorrectly. It should use "conduct" or "lead" instead of "assist," as "assist" means to help, not to manage a series of interviews. Sentence II uses "assist" incorrectly as well. The correct verb should be "conduct" or "perform" because "assist" means to help, not to carry out the experiment. Sentence III uses "assist" incorrectly. It should be "verify," as "assist" means to help, not to confirm or check accuracy.

Q197

In the following questions, some part of the sentence is underlined. Which of the

Options

- A. increasingly appeared out of step with its
- B. increasingly appears out of step within its
- C. increasingly appears out of step with it's
- D. increasing appeared out of step with its

E. No Correction required

Correct Answer: No Correction required

Explanation: The sentence is correct in its form.

Q198

In the following questions, some part of the sentence is underlined. Which of the

Options

- A. could face greatest strain as they
- B. could face greater strain as it
- C. can face greater strain as it
- D. could face greater strain as they
- E. No Correction required

Correct Answer: could face greater strain as they

Explanation: The phrase "could face greater strain" is the correct form. "Greater" is the comparative form used to compare the strain experienced by smaller and newer players, implying that they might face more strain than others.

Q199

In the following questions, some part of the sentence is underlined. Which of the

Options

- A. it would arguably be more prudent to
- B. it won't arguably be more prudent to
- C. it would argue to be more prudent than
- D. it will argue be more prudent to
- E. No Correction required

Correct Answer: it would arguably be more prudent to

Explanation: "It would arguably be more prudent to" is the most grammatically and contextually correct option. The sentence suggests that if a company is burdened with costly debt, it would be a wise decision to reduce or eliminate those interest expenses. The conditional "would" is appropriate here because it aligns with the hypothetical situation (being burdened with debt) and suggests that this is the prudent course of action.

Q200

In the following questions, some part of the sentence is underlined. Which of the

Options

- A. who had reduced its tenor of risk identification over
- B. who had reduced its tenor of risk identification above
- C. who had reduced their tenor of risk identification over
- D. who have reduced their tenor of risk identification of
- E. No Correction required

Correct Answer: who had reduced their tenor of risk identification over

Explanation: The subject of the sentence is "Companies," which is plural. So, the pronoun referring to "Companies" must be "their" and not "its". "Had reduced" correctly implies past action, and the word "over" makes sense in the context of time, indicating the reduction occurred over a period.
